CEO'S MESSAGE

Dear Sir/Madam,

The Sun Life Malaysia investment-linked takaful protection plan that you participated will act as a safety net in uncertain times and provides financial security for you and your loved ones. Combining the 2 elements of protection and investment, your plan is for the longer term and allows you to stay in control of your investment through our diverse array of funds available.

2014 was a challenging year for Malaysia as we saw the rise of Overnight Policy Rate (OPR) by 25bps to 3.25% in July. Negative corporate earnings growth, poorer sales, write-down and forex losses also largely contributed to the poor performance of our equities market where FTSE Emas Shariah Index (FBMS) registered a -4.2% result. Going into 2015, earnings growth is expected to remain soft due to a slower macro-economic environment.

Despite the overall market sell-off, Sun Life Malaysia Islamic Equity Fund outperformed its benchmark FBMS by 0.5% for the year. However, crude oil price fell significantly in the last quarter of 2014 while Malaysian Ringgit weakened. As a result, the fixed income market saw a sharp fall in bond prices and our Sun Life Malaysia Islamic Bond Fund registered a return of 2.9% for the fiscal year, underperforming the benchmark by 0.1%.

Happenings in 2014

2014 marked a momentous year where we saw sustainable growth and accomplishments through our continuous innovation and improvement of our products and services. CEO'S MESSAGE

(CONTINUED)

In line with Sun Life Financial's community focus on helping persons with diabetes and health programmes to prevent this disease, we collaborated with Diabetes Malaysia and HOPE Worldwide Malaysia in a series of Corporate Responsibility (CR) activities during the second half of 2014. Under the banner of "Brighter YOU", we proactively reached out to the underprivileged through financial sponsorships that help the management of the disease and organise preventive health activities to improve overall wellness. With the support of our staff volunteers who contributed their time, effort and money, 12 programmes were organised, benefiting more than 600 underprivileged families.

Into 2015

Looking ahead, our focus remains on providing sound financial solutions to our customers and always working with their interests in mind. We are confident that the growth strategies planned for this year would place us in a positive position to face all challenges for our long-term success.

Your financial future is unique to your needs and situation and it is important for us to continue to work together towards building a solid foundation for your lifetime financial security. Thank you for letting us be your partner on your financial journey and our best wishes to you for a great year ahead.

MARKET REVIEW AND 2015 OUTLOOK

2014 Global Gross Domestic Product (GDP) growth is expected to recover to about 2.4% (yoY). Consensus estimates Eurozone growth to return to black at 0.8% having registered negative growth in 2011 and 2012. Asia export oriented economies such as Korea and Taiwan have both experienced a GDP growth of about 3.3% in 2014. Driven by strong export numbers, Malaysia GDP growth has likewise been strong with an expected growth of about 5.8%. However, the strong GDP growth has not been reflected in domestic equities performance where key sectors, namely, banks, property and telecommunication have had slower earnings growth in 2014. Bank Negara Malaysia (BNM) hiked the OPR by 25bps to 3.25% in the July Monetary Policy Committee (MPC) meeting. Towards the last quarter of the year, tumbling crude oil prices stirred concern on the country's fiscal health while MYR weakened. In reaction, sovereign yields increased (price decreased). Foreign bond holdings in Malaysian Government Securities (MGS) declined sharply from the high of 48.4% in July 2014 to 44.5% in November 2014. On the flipside, longer dated bonds were more resilient to the yield movements, seeing support from market players for yield pickup.

Going into 2015, the traction of global growth recovery is expected to continue, led by robust economic activities in the U.S. With the latest round of Quantitative Easing (QE) from the European Union, a subdued and weak Euro is expected to further spur the export growth for the European Union (EU) countries. Overall, global economy growth is looking promising in 2015. Nonetheless, it could prove challenging for Malaysia given its sensitivity to lowering crude oil price trend. GDP growth would continue to be domestically driven. Consumer sentiment may be weak following the Goods and Services Tax (GST) implementation. However, we believe this may be short-lived as deferment of scheduled electricity tariff hike and falling oil price would somewhat mitigate the negative appetite on private expenditure. On the fiscal front, current account surplus is expected to remain but official estimate for budget deficit has been revised down to -3.2% of GDP from the earlier guidance of -3.0%. Official GDP forecast has also been lowered to 4.5-5.5% from the initial guidance of 5.0 ~ 6.0%. Inflation is expected to be stable and we expected OPR to be maintained throughout the year.

On market front, we are staying cautious on equities' valuation given that corporate earnings profile is a bit uncertain at current juncture. However, any downside risk to Malaysia equities in the coming months would present itself as good buying opportunities. We continue to stay heavily invested in defensive earnings sectors while awaiting opportunities to increase equities exposure in coming months. Domestic bond market would continue to be choppy as uncertainties could trigger selling pressure from foreign investors. Nonetheless, this would create an avenue for the fund to pick on dip. In terms of strategy, we are to maintain short duration for fixed income to minimize the impact from market volatility.

PERUTUSAN KETUA PEGAWAI EKSEKUTIF

Tuan/Puan,

Pelan perlindungan takaful berkaitan-pelaburan Sun Life Malaysia yang telah anda serta akan bertindak sebagai jaring keselamatan anda di masa yang tidak menentu dan menyediakan jaminan kewangan untuk anda dan juga orang tersayang. Menggabungkan 2 unsur iaitu perlindungan dan pelaburan, pelan anda adalah untuk jangka panjang dan membenarkan anda mengawal pelaburan anda melalui kepelbagaiannya kami yang sedia ada.

2014 merupakan tahun yang mencabar bagi Malaysia dengan kenaikan Kadar Dasar Semalam (OPR) sebanyak 25 mata asas ke 3.25% pada bulan Julai. Pertumbuhan pendapatan korporat yang negatif, pengurangan jualan, penurunan dan kerugian tukaran matawang asing (forex) juga telah banyak menyumbang kepada prestasi lemah pasaran ekuiti di mana Indeks FTSE Emas Shariah (FBMS) mencatatkan prestasi -4.2%. Melangkah ke tahun 2015, pertumbuhan pendapatan dijangka kekal lemah disebabkan oleh persekitaran makro-ekonomi yang lebih perlahan.

Walaupun keseluruhan pasaran saham mengalami penjualan ekuiti dari pelabur asing dan domestik, Dana Sun Life Malaysia Islamic Equity tetap mengatasi penanda aras FBMS sebanyak 0.5% bagi tahun ini. Walau bagaimanapun, kejatuhan harga minyak mentah yang ketara pada suku terakhir tahun 2014 dan penurunan nilai Ringgit Malaysia telah menyebabkan Dana Sun Life Malaysia Islamic Bond mencatatkan pulangan 2.9% bagi tahun fiskal, di bawah penanda aras sebanyak 0.1%.

ULASAN PASARAN DAN UNJURAN 2015

Pertumbuhan Keluaran Dalam Negara Kasar (“KDNK”) Global 2014 dijangka pulih kepada kira-kira 2.4% (tahun ke tahun). Konsensus menganggarkan pertumbuhan zon Euro untuk kembali ke tanda hitam pada 0.8% setelah mencatatkan pertumbuhan negatif pada tahun 2011 dan 2012. Eksport ekonomi berorientasi Asia seperti Korea dan Taiwan kedua-duanya mengalami pertumbuhan KDNK kira-kira 3.3% pada tahun 2014. Didorong oleh jumlah eksport yang kukuh, pertumbuhan KDNK Malaysia telah juga menjadi kukuh dengan peningkatan dijangka kira-kira 5.8%. Walau bagaimanapun, pertumbuhan KDNK yang kukuh tidak menunjukkan prestasi kepada ekuiti domestik di mana sektor-sektor utama, iaitu, bank, hartanah dan telekomunikasi mempunyai pertumbuhan pendapatan yang lebih perlahan pada tahun 2014. BNM menaikkan OPR sebanyak 25 mata asas kepada 3.25% pada mesyuarat MPC bulan Julai. Menjelang suku terakhir tahun ini, kejatuhan harga minyak mentah serta MYR yang lemah menimbulkan kebimbangan mengenai keadaan fiskal negara. Akibatnya, hasil pasaran Securiti Kerajaan Malaysia (“MGS”) meningkat (harga menurun). Pegangan bon asing dalam MGS menurun secara mendadak daripada yang tertinggi 48.4% pada bulan Julai 2014 ke 44.5% pada bulan November 2014. Dari sudut lain, bon tempoh matang panjang kurang dipengaruhi oleh pergerakan kadar hasil, akibat sokongan daripada peserta pasaran yang mengambil kesempatan untuk mendapat hasil pasaran yang lebih lumayan.

Melangkah ke tahun 2015, daya tarikan pemulihan pertumbuhan global dijangka berterusan, diterajui oleh aktiviti ekonomi yang kukuh di Amerika Syarikat dengan pusingan terbaru QE dari Kesatuan Eropah, Euro yang tidak kukuh dan lemah dijangka merangsang lagi pertumbuhan eksport untuk negara-negara Kesatuan Eropah (EU). Secara keseluruhan, pertumbuhan ekonomi global dijangka memberangsangkan pada tahun 2015. Namun begitu, ia akan membuktikan cabaran bagi Malaysia terhadap kepekaan untuk menurunkan aliran harga minyak mentah. Pertumbuhan KDNK akan terus didorong secara domestik. Sentimen pengguna boleh menjadi lemah berikutan pelaksanaan GST. Walau bagaimanapun, kami percaya ini mungkin kekal lama kerana penangguhan penjadualan kenaikan tarif elektrik dan kejatuhan harga minyak bagaimanapun akan mengurangkan keinginan negatif ke atas perbelanjaan swasta. Dari segi fiskal, lebihan akaun semasa dijangka kekal tetapi anggaran rasmi untuk defisit bajet telah disemak semula kepada -3.2% daripada KDNK dari jangkaan awal -3.0%. Unjuran KDNK rasmi juga telah diturunkan kepada 4.5 ~ 5.5% daripada jangkaan awal sebanyak 5.0 ~ 6.0%. Inflasi dijangka menjadi stabil dan kita menjangkakan OPR akan dikekalkan sepanjang tahun.

Di pasaran saham, kami tetap berwaspada terhadap penilaian ekuiti memandangkan profil pendapatan korporat yang agak tidak menentu pada masa sekarang. Walau bagaimanapun, apa-apa risiko penurunan kepada ekuiti Malaysia pada bulan-bulan yang akan datang menunjukkan sebagai peluang belian yang baik. Kami terus kekal melabur secara besar-besaran dalam sektor perolehan defensif sementara menunggu peluang untuk meningkatkan pendedahan ekuiti dalam beberapa bulan akan datang. Volatiliti Pasaran bon domestik akan berterusan akibat dari ketidaktentuan dan ini boleh mencetuskan tekanan jualan daripada pelabur asing. Namun begitu, ini akan mewujudkan ruang kepada dana memilih untuk membeli apabila harga rendah. Dari segi strategi, kami mengekalkan tempoh yang singkat terhadap pendapatan tetap untuk meminimumkan kesan volatiliti pasaran.
