# CEO's Message

Dear Valued Certificate Holders,

We are pleased to present the 2013 Takaful Investment-Linked Fund Performance Report for your review.

2013 was an eventful year for the Company. On 12 April 2013, Renggis Ventures Sdn Bhd, a subsidiary of Khazanah Nasional Berhad, and Sun Life Assurance Company of Canada, a subsidiary of Sun Life Financial Inc, successfully completed the acquisition of CIMB Aviva Takaful Berhad. Following the acquisition, on 19 August 2013, the Company took on a new name and identity, Sun Life Malaysia Takaful Berhad.

The new shareholding renewed our drive to provide best-in-class protection for Malaysian consumers and businesses of all sizes. Through our exclusive partnership with CIMB Group, we now distribute our products through CIMB Bank's network of more than 300 branches and eight million customers across the country. To boost our market share and place Sun Life Malaysia as a commendable bancatakufl player in Malaysia, we have been focusing on developing multiple distribution channels and reinventing our product suite to meet the changing demands of today's consumers.

## **Strong Performance in 2013**

Despite a volatile equities market, Sun Life Malaysia Islamic Equities Fund saw a return of 11.2% for 2013, recording a slight underperformance as compared to FTSE Emas Shariah benchmark's return of 13.3%. As for Sun Life Malaysia Islamic Bond Fund, it reflected a return of 2.6% for 2013, mainly attributed to the shift of the yield curve which nevertheless contributed to its 15.8% return since inception in 2009.

## **There in time of need**

Our ambitious goals have not distracted the Company from carrying out our obligations as a responsible Takaful company. In the months of November and December 2013, when floods hit various locations across the states of Pahang, Terengganu and Johor, we took proactive measures to simplify the process of making claims and ensured that our affected customers were aware of the various avenues we had for easier facilitation of their claims. Operating out of various hotels, adjuster branches and other strategic locations, our staff dealt with 513 cases and paid out a total of RM2.3 million in claims. Average turnaround time to process a claim was just 3 working days, as we knew how important the payout was for our affected certificate holders.

## **Focus on our Customers**

Looking ahead, we recognise that there is still much room for improvement especially when it concerns re-invigorating our focus on our customers. To understand the true experience of our customers, various focus groups were conducted among employees, sales advisors and customers. As a result of this, we rolled out Customer Experience Programme (CEP), a long-term programme which is a framework for systematically assessing and improving customer experiences as well as to encourage a corporate culture shift that places our customers at the center of everything that we do.

As we begin this new journey to serve you better, we thank you for your support and your trust. We wish you good health and prosperity for 2014.

**MUHAMMAD FIKRI MOHAMAD RAWI**

# Market Review and 2014 Outlook

## Market Review and 2014 Outlook

Global real gross domestic product (GDP) grew at 2.1% in 2013, i.e another slower growth year since 2010. While the U.S economy has been showing signs of revival where key macro data were robust in recent quarters, certainty of an improving global growth outlook really hinges on a sustained overall growth trend. U.S just reported its 2013's GDP growth figure that has shrunk to 1.9% versus 2012's growth at 2.8%. The Eurozone economy, in contrast, reported a smaller contraction in 2013's GDP growth at -0.5% versus 2012's -0.7%. In Asia, Japan's massive quantitative easing (QE) programme has been supportive of its economy from a weaker Yen driven export growth's perspective. On China, real GDP growth of around 7.5% is expected to be a norm in coming years given a change of government policy in a bid to move up the economic value chain.

Domestically, Malaysia economic growth has declined to 4.7% for 2013. Going into 2014, our economy may face tougher challenges predominantly due to various costs hike measures as a result of the government fiscal discipline. Consumer demands will be largely tested as headline inflation is expected to hit above 3% in 2014, up from 2.1% in 2013. While the bulk of government's driven infrastructure projects under the Economic Transformation Programme (ETP) should continue to drive growth and job opportunities, we are cautious against a more muted private sector growth outlook.

Malaysia fixed income market saw significant government bonds selling from global fund managers since the peak of their holding in the middle of last year. The overall foreign ownership has shrunk from the all-time-high of around 50% in May to below 45% in November 2013. This happened on the back of the U.S QE tapering programme that should see further bond yield rising in the coming quarters. Despite the fact that the bulk of our government bonds foreign holders are made up of various central banks who tend to be long-term bond holders, further repatriation of funds from emerging markets due to the unwinding of QE would not bode well for our market. In 2014, Malaysia bond market is expecting a gross issuance of RM160 billion of Malaysia government and private debt securities. This would be slightly lower than 2013's issuance size of RM176 billion.

On equities, KLCI returned a solid 10.5% last year while putting the market's valuation into a fairly valued zone based on historical average Price-to-earning (PE) ratio. In fact, the equities' performed strongly even though the overall corporate reported a negative earning's growth in 2013. Trading currently at 15.9x 2014 PE, we are of the view that the upside for Malaysia equities could be challenging for 2014. Due to a rich valuation per se, we, therefore, expect a lot more trading volatilities throughout the year.

Strategy wise, we would keep our duration short for the fixed income portfolio to cushion any price hit from a rising yield environment. As for equities, we are tilting more exposure into defensive earning stocks in order to protect portfolio's returns from a heightened volatility in the market.

# Perutusan Ketua Pegawai Eksekutif

Pemegang Sijil yang Dihargai,

Kami berbesar hati membentangkan Laporan Prestasi Dana Berkaitan-Pelaburan Takaful tahun 2013 untuk semakan anda.

2013 merupakan tahun yang mengujakan untuk Syarikat. Pada 12 April 2013, Renggis Ventures Sdn Bhd, subsidiari kepada Khazanah Nasional Berhad dan Sun Life Assurance Company of Canada, subsidiari kepada Sun Life Financial Inc., telah berjaya menyelesaikan urusan pengambilalihan CIMB Aviva Takaful Berhad. Berikutnya pengambilalihan tersebut, pada 19 Ogos 2013, Syarikat telah menggunakan nama dan identiti baru, Sun Life Malaysia Takaful Berhad.

Pegangan saham baharu ini membakar semangat kami untuk menyediakan perlindungan terbaik-mengikut-kelas kepada semua pengguna dan perniagaan Malaysia. Melalui perkongsian eksklusif kami bersama Kumpulan CIMB, kami kini mengedarkan produk kami melalui rangkaian CIMB Bank yang mempunyai lebih 300 cawangan dan lapan juta pelanggan di seluruh negara. Bagi meningkatkan pegangan pasaran dan meletakkan Sun Life Malaysia sebagai penyedia bankatakufl utama di Malaysia, kami memberi tumpuan kepada pembangunan pelbagai saluran edaran dan penciptaan-semula produk kami untuk memenuhi citarasa pengguna hari ini.

## **Prestasi Kukuh pada 2013**

Walaupun pasaran ekuiti mengalami penguncutan, Dana Sun Life Malaysia Islamic Equities tetap menghasilkan pulangan sebanyak 11.2% untuk 2013, rendah sedikit berbanding prestasi pulangan penanda aras FTSE Emas Shariah yang mencatatkan pulangan 13.3%. Untuk Dana Sun Life Malaysia Islamic Bond pula mencatatkan pulangan 2.6% untuk tahun 2013, berpunca dari perubahan kepada lengkuk pulangan yang bagaimanapun menyumbang kepada pulangan 15.8% yang dicatatkan sejak penubuhannya pada tahun 2009.

## **Sentiasa di sisi apabila diperlukan**

Matlamat utama kami tidak menjelaskan kemampuan Syarikat daripada menuaikan kewajipan kami sebagai sebuah syarikat takaful yang prihatin. Pada bulan November dan Disember 2013, semasa negeri Pahang, Terengganu dan Johor dilanda banjir yang teruk, kami telah mengambil langkah proaktif untuk memudahkan proses membuat tuntutan dan menyediakan pelbagai kemudahan demi memudahkan pelanggan yang terjejas untuk membuat sebarang tuntutan. Beroperasi di beberapa buah hotel, cawangan pelaras dan lokasi-lokasi yang strategik, kakitangan kami menguruskan 513 kes dan membayar tuntutan berjumlah RM2.3 juta. Tempoh masa purata yang diperlukan untuk memproses tuntutan hanya 3 hari bekerja, kerana kami memahami betapa pentingnya pembayaran tersebut kepada para pemegang sijil kami yang terjejas.

## **Tumpuan kepada Pelanggan Kami**

Melangkah ke hadapan, kami menyedari bahawa masih terdapat ruang untuk penambahbaikan terutamanya dalam memastikan tumpuan kami kekal fokus terhadap pelanggan kami. Untuk memahami pengalaman sebenar yang dialami oleh para pelanggan, pelbagai usaha berkumpulan telah dijalankan dengan kerjasama kakitangan, penasihat jualan dan pelanggan. Hasilnya, kami telah melancarkan Program Pengalaman Pelanggan atau Customer Experience Programme (CEP), satu pelan jangka panjang yang merupakan satu rangka kerja untuk menilai dan memperbaiki pengalaman pelanggan secara sistematis serta menggalakkan peralihan budaya korporat agar pelanggan kami menjadi nadi untuk segala yang kami lakukan.

# Ulasan Pasaran dan Unjuran 2014

## Ulasan Pasaran dan Unjuran 2014

Keluaran dalam negara kasar (KDNK) global mencatatkan 2% untuk 2013, menandakan satu lagi tahun pertumbuhan yang sederhana sejak 2010. Sungguhpun ekonomi AS telah menunjukkan tanda-tanda pemulihan di mana data makro utama agak cergas untuk beberapa suku terbaru, kepastian mengenai unjuran pertumbuhan global yang lebih baik bergantung sepenuhnya kepada pengekalan trend pertumbuhan keseluruhan. A.S baru sahaja melaporkan angka pertumbuhan KDNKnya bagi tahun 2013 telah menyusut kepada 1.9% berbanding 2.8% pada tahun 2012. Berbeza dengan ekonomi Zon Eropah yang melaporkan penguncutan lebih kecil dengan mencatatkan KDNK -0.5% untuk tahun 2013 berbanding 0.7% pada tahun 2012. Di Asia pula, program pelonggaran kuantitatif (Quantitative Easing) secara besar-besaran oleh Jepun telah menyokong ekonominya daripada kelemahan Yen didorong oleh kelembapan pertumbuhan eksport. Di China pula, pertumbuhan KDNK sebenar sekitar 7% dijangka menjadi lumrah untuk beberapa tahun akan datang berikutan perubahan dasar kerajaan dalam usaha untuk melonjakkan rantaian nilai ekonomi negara itu.

Dalam negara pula, pertumbuhan ekonomi Malaysia telah turun kepada 4.7% untuk tahun 2013. Melangkah ke tahun 2014, ekonomi negara mungkin berdepan dengan cabaran yang lebih sukar disebabkan oleh kenaikan kos akibat pengenalan dasar baru kerajaan bagi mengetarkan fiskal. Permintaan pengguna akan teruji apabila inflasi dijangka naik melebihi 3% pada 2014, peningkatan 2.1% daripada 2013. Meskipun kebanyakan projek prasarana kerajaan di bawah Program Transformasi Ekonomi (ETP) dijangka dapat menyokong pertumbuhan dan peluang pekerjaan, kami menjangkakan kemungkinan unjuran sektor swasta yang lebih suram.

Pasaran pendapatan tetap Malaysia menyaksikan jualan besar bon kerajaan oleh pengurus dana asing sejak pegangan tertinggi mereka pada pertengahan tahun lepas. Pemilikan asing keseluruhan telah mengecil dari paras rekod tertinggi sekitar 50% pada bulan Mei kepada di bawah 45% pada bulan November 2013. Ini disebabkan oleh program penirusan oleh program pelonggaran kuantitatif (Quantitative Easing) A.S yang bakal menyaksikan pulangan bon meningkat untuk beberapa suku akan datang. Walaupun kebanyakan pegangan asing bon kerajaan kita dimiliki pelbagai bank pusat yang biasanya merupakan pemegang bon jangka panjang, penghantaran pulang dana berterusan dari pasaran baru yang meningkat akibat penggulungan QE mungkin memberikan kesan yang kurang baik kepada pasaran bon Malaysia. Pasaran juga menjangkakan terbitan kasar bon kerajaan dan swasta sebanyak RM160 bilion untuk tahun 2014. Penurunan sederhana berbanding saiz terbitan sebanyak RM176 bilion pada 2013.

Untuk ekuiti pula, KLCI mencatatkan pulangan kukuh 10.5% tahun lepas, sekaligus meletakkan penilaian pasaran dengan nilai yang agak adil berdasarkan purata nisbah lampau harga-kepada-perolehan (PE). Malah, saham telah menghasilkan prestasi yang kukuh walaupun keseluruhan korporat mencatatkan pertumbuhan perolehan negatif untuk tahun 2013. Kini didagangkan pada 15.9x 2014 PE (Price Earning), kami berpendapat bahawa kenaikan ekuiti Malaysia agak mencabar pada 2014. Berasaskan penilaian tinggi sahaja, kami menjangkakan ketidaktentuan pasaran akan berlaku sepanjang tahun.

Dari sudut strategi syarikat pula, kami akan mengekalkan tempoh pegangan singkat untuk portfolio pendapatan tetap agar dapat menampung sebarang kenaikan harga akibat persekitaran pulangan yang meningkat. Untuk saham pula, lebih pendedahan akan ditumpukan ke dalam saham perolehan defensif untuk melindungi pulangan portfolio daripada peningkatan turun-naik dan ketidaktentuan pasaran.
