Market Review

Market Review and 2013 Outlook

The global economy grew at 3% in 2012, a markedly slower pace than the 3.8% and 5.1% seen in 2011 and 2010 respectively. The outlook for global growth remains uncertain due to the continuing European sovereign debt crisis and market volatility. Proposed austerity measures to solve the European debt crisis has damped economic activity and pushed unemployment up, leading to a loss of confidence and tighter consumption patterns. Not surprisingly, G3 central banks have turned dovish and pumped additional liquidity into the financial system in an effort to arrest the decline.

In Malaysia, Gross Domestic Product is expected to grow at a moderate pace of 4.7% in 2013 from a high base of around +5.2% in 2012. The implementation of the minimum wage policy from 1st January 2013 and further rationalisation of subsidies after the general election may lead to inflationary pressures. Headline inflation for 2013 is expected to trend higher to an average of 2.0%-2.5% from 2012's reading of 1.6%. Note too that with the anticipation of higher inflation in 2013, the market expects Bank Negara Malaysia to hike interest rates in the later part of the year.

The fixed income market saw good buying interest for both conventional and Islamic government securities as demand was bolstered by high foreign participation in primary auctions. As a result, foreign holdings of Malaysian debt securities as a proportion of total issuance reached an all-time high of 45%. Bank Negara Malaysia, on the other hand, held the OPR stable at 3.0% throughout the year as the economy expanded at a moderate pace. The Malaysian bond market is expected to further strengthen in 2013 with estimated gross issuance of government and private debt securities ranging from RM90 to RM100 billion respectively.

The FBM Shariah Index managed to close the year around 11,520.70, returning about 11.8% for 2012. Profit-taking was seen throughout the year but November remains as the worst month of the year as the index returned -4.79% (annualised -46.1%) on widespread selling pressure. The oil & gas, telecommunications, and REITS sectors were among the more performing sectors while the performance for commodities was fairly muted. In 2013, we expect the market to remain cautious as valuations in the equity market are still relatively expensive at consensus' 2013 price/earnings expectations versus a low single digit earnings growth expectation.

Going forward, we will continue to rebalance the Shariah-compliant investment portfolio in alignment with the respective fund's mandates and objectives by investing in Shariah-compliant fixed income securities and a diverse selection of equities that comply with Shariah principles.

Ulasan Pasaran

Ulasan Pasaran dan Unjuran 2013

Ekonomi global mengalami pertumbuhan 3% pada tahun 2012, dengan kadar yang lebih perlahan berbanding 3.8% pada tahun 2011 dan 5.1% pada tahun 2010. Krisis hutang negara Eropah dan ketidaktentuan pasaran yang berterusan menjadikan pertumbuhan global kekal samar. Langkah penjimatatan yang disarankan untuk menyelesaikan krisis hutang Eropah telah menjelaskan aktiviti ekonomi dan meningkatkan kadar pengangguran, sekaligus menyebabkan kehilangan keyakinan dan menghadkan corak perbelanjaan. Dengan keadaan semasa tidak mengejutkan apabila bank pusat G3 mengambil langkah berwaspada, dengan meningkatkan kecairan untuk dialirkan ke dalam sistem kewangan.

Di Malaysia, Keluaran Dalam Negara Kasar dijangka berkembang pada kadar sederhana 4.7% untuk tahun 2013 berbanding asas yang tinggi sekitar +5.2% pada tahun 2012. Pelaksanaan dasar gaji minimum yang bermula pada 1 Januari 2013 serta perlanjutan program rasionalisasi subsidi selepas pilihanraya umum mungkin akan menyebabkan tekanan inflasi. Aras inflasi untuk 2013 dijangka akan meningkat lebih tinggi dengan purata sekitar 2.0% - 2.5% berbanding catatan 1.6% pada 2012. Berdasarkan unjuran inflasi yang lebih tinggi, pasaran menjangkakan akan berlaku kemungkinan kenaikan kadar faedah oleh Bank Negara Malaysia pada pertengahan tahun 2013.

Pasaran bon menyaksikan minat belian yang baik untuk kedua-dua sekuriti konvensional dan sukuk kerajaan di mana permintaan telah didorong oleh penyertaan asing yang tinggi di dalam bidaan utama. Hasilnya, pegangan asing dalam sekuriti hutang Malaysia berbanding jumlah terbitan mencatat paras tertinggi 45%. Bank Negara Malaysia pula, telah mengekalkan OPR pada kadar 3.0% sepanjang tahun tatkala ekonomi berkembang pada kepesatan sederhana. Pasaran bon Malaysia dijangka mengukuh pada 2013 dengan anggaran terbitan kasar sekuriti hutang kerajaan dan swasta masing-masing di antara RM90 hingga RM100 bilion.

Indeks Shariah FBM ditutup tinggi pada paras 11,520.70, dengan pulangan sekitar 11.8% untuk tahun 2012. Terdapat beberapa sesi kitaran pengambilan untung yang berlaku di sepanjang tahun dengan bulan November mencatatkan Indeks yang paling teruk untuk tahun 2012. Indeks November mencatatkan pulangan -4.79% (tahunan - 46.1%) berikutan faktor tekanan jualan. Sektor seperti minyak & gas, telekomunikasi dan REITs adalah antara sektor berprestasi tinggi manakala komoditi secara amnya agak tenggelam. Tahun 2013 kita menjangkakan pasaran kekal berwaspada memandangkan penilaian di pasaran ekuiti masih agak mahal berdasarkan konsensus jangkaan harga/pulangan berbanding jangkaan pertumbuhan perolehan digit tunggal yang rendah.

Melangkah ke hadapan, kami akan terus mengimbangi portfolio pelaburan berlandaskan Shariah agar seajar dengan mandat dan objektif dana-dana berkaitan melalui pelaburan di dalam sukuk dan kepelbagaiannya pilihan ekuiti yang mematuhi prinsip Shariah.
