 CEO's Message

Dear Valued Policyholders,

In 2011, we re-laid the foundation for CIMB Aviva with focus on developing products and enhancing our services for our customers. Our objective was to ensure that we deliver sustainable value and customer satisfaction in the months and years ahead.

We saw the launch of various new products – Ultimate Term Plan (UTP) in January and subsequently in August, the Shariah version, Ultimate Term Takaful Plan (UTTP). Targeted for the affluent and high net worth, both are term plans with a high level of protection at very affordable premiums.

Towards the end of the year, we expanded our product suite through the Ultimate Biz Plan for the Small and Medium Enterprise (SME) segment and this was conceived based on solutions for today and over the long term catering to the various risk exposures of an SME business that focuses on cover for business continuity, family protection and loan cover.

During the year, the company oversaw a major reorganisation of initiatives to establish a stronger CIMB Aviva and so we embarked on enhancing our brand value to demonstrate and reinforce our presence in Malaysia and this is expected to continue through 2012.

CIMB Aviva remains mindful of its corporate responsibility (CR) in the community where we operate and we advocate being responsible corporate citizens. We recognise the importance of social, economic and environmental sustainability; hence our CR programme is founded on Aviva's global initiative, themed **Street to School**. This global initiative is aimed at getting disadvantaged children off the streets and into school, providing opportunities for them to develop their fullest potential.

Our partnership with HOPE worldwide (KL) started in April 2011 and we successfully ran programmes that benefited 253 children. A large majority of our employees also volunteered their services throughout the year in support of CIMB Aviva's CR initiative and this will continue this year too. This programme focuses on educational needs as we believe that through education, it is highly likely that these children will be able to benefit over the longer term.

Looking ahead

The senior management team at CIMB Aviva set key priorities to enhance the business further and value creation was key for these priorities through a clear strategic plan. Whilst simple to express, substantial and diligent activity and follow through are required to turn them into relevant, tangible and lasting change. This company continually looks for ways to form new relationships and enhance its partnerships and CIMB Aviva's financial and operating performance in 2011 has created a springboard for growth. Our goal is to continue with this growth, combining a broad set of skills and experience through the best blend of people and we remain committed to see this through in 2012 and the years to come, taking cognisance of the longer term developments in the insurance industry.

 CEO'S Message (cont'd.)

Last year was an experience of continued period of economic recovery in spite of the lingering uncertainty and the wider world did not stand still in 2011. We saw rapid and sometimes unpredicted change led by the European market slowdown; cushioned by growth in Asia and improvement in the US economy. CIMB Aviva will adapt and understand these changes in order to remain sustainable and with the Malaysian economy expecting to be looking positive, led by sturdy domestic demand and the government's initiatives in creating a high income nation, we see increasing forward momentum ahead.

We ended the year stronger and we thank you for your continued support and trust. In closing we wish you all success and a good 2012!

Yen Saw
Chief Executive Officer
CIMB Aviva Assurance Berhad

Market Review

2011 MARKET REVIEW

In a nutshell, the global economic recovery continued in 2011 amidst policy uncertainty on the resolution of the ongoing sovereign debt crisis in Europe. The European market slowdown was somewhat cushioned by Asia growth and a significant improvement in the US economy in Q42011 aided by the US Federal Reserve's low-rate policy.

Locally, Malaysia's gross domestic product (GDP) expanded 5.1% in 2011 compared to 7.2% in 2010 as domestic demand conditions remained favourable supported by both private and public sector spending.

During the year under review, Bank Negara Malaysia (BNM) in its Monetary Policy Committee meeting has raised its Overnight Policy Rate (OPR) by 25 basis points from 2.75% in 2010 to 3.0% in 2011. In the same period, BNM also raised the Statutory Reserve Requirements (SRR) from 1.0% to 4.0% to manage and rebalance the liquidity in the market. This was in line with the rising inflationary energy and commodities prices with the Consumer Price Index (CPI) trended upward from 2.4% in January to 3.0% in December and recorded an average of 3.2% for the year 2011.

In the equity market, the FBM KLCI was experiencing a volatile year in 2011. The FBM KLCI recorded an increase of 2.7% in 1Q11 to 1,582 points while 3Q11 saw a decline of 12% to 1,393 points due to severe selling pressure on risk aversion in EU sovereign debts refinancing programmes and news on its credit rating downgrading. Subsequently, the FBM KLCI recovered modestly in 4Q11 to close the year at 1,530.7 points with positive continuous government and private sectors collaborations to increase investment and domestic consumption to achieve a commendable growth in 2012.

CIMB Aviva is of the view that we do not anticipate a significant increase in Malaysia's CPI although food prices will remain a major issue with the expectation of interest rate to remain accommodative in 2012. The domestic bond market is expected to remain volatile due to continuous movement in portfolio investment during the year. In Bursa Malaysia, the FBM KLCI performance is expected to be largely driven by news flow from mergers and acquisitions, Economic Transformation Programme (ETP) and the forthcoming 13th general election in Malaysia.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following accounting policies have been used consistently in dealing with items which are considered material in relation to the financial statements.

(a) Basis of preparation

The financial statements of the Funds have been prepared under the historical cost convention except as disclosed in this summary of significant accounting policies and comply with the Financial Reporting Standards ("FRS") in Malaysia, as modified by the Guidelines on Investment-Linked Insurance/Takaful Business issued by Bank Negara Malaysia ("BNM") pursuant to the Insurance Act, 1996.

The preparation of financial statements in conformity with FRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reported financial year. It also requires the Manager to exercise their judgement in the process of applying the Funds' accounting policies. Although these estimates and judgement are based on the Manager's best knowledge of current events and actions, actual results may differ from those estimates.

Notes to the Financial Statements

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd.)

(a) Basis of preparation (cont'd.)

- Amendment to FRS 7 "Financial instruments: Disclosure – improving disclosures about financial instruments"

The adoption of the above amendment to FRS 7 does not have any significant impact to the financial statements of the Funds except for enhanced disclosures on fair value measurement and liquidity risk.

- Standards, amendments to published standards and interpretations to existing standards that are applicable to the Funds but not yet effective

In the next financial year, the Funds will be adopting the new International Financial Reporting Standard ("IFRS") compliant framework, Malaysian Financial Reporting Standards ("MFRS"). In adopting the new framework, the Funds will be applying MFRS 1 "First-time adoption of MFRS". There are no MFRS that are not yet effective that would be expected to have a material impact to the Funds.

(b) Investments

- Fair value through profit or loss financial assets

Investments of the Funds are designated at initial recognition at fair value through profit or loss as they are managed and evaluated on a fair value basis in accordance with the respective investment strategy and mandate.

All purchases of investments are recognised on their trade dates, i.e. the date the commitment exists to purchase the investments. The investments are initially recorded at cost, being fair value of the consideration given. The attributable transaction costs are recognised in the statement of income and expenditure when incurred.

After initial recognition, the investments are recorded at fair value and the unrealised gains or losses on re-measurement to fair value are taken to the statement of income and expenditure.

- Fair value of financial assets

Quoted investments comprising equity securities are valued at the market value at the balance sheet date. Fair value of quoted securities is determined by reference to the stock exchange closing price at the balance sheet date.

Fair value of unquoted investments comprising Malaysia Government Securities and corporate debt securities are based on indicative fair market prices/index by reference to the quotations provided by financial institutions and brokers at the balance sheet date.

9. RISK MANAGEMENT

The Manager has in place a comprehensive and integrated risk management framework ("the framework") and methodology in managing risks and opportunities. The framework, which is adopted from Aviva Group, is designed to support the identification, assessment, monitoring and control of significant risks and translate the impact on both earnings and capital. A risk dashboard is integrated within the framework to provide an overview of the Funds' overall risk exposure. The framework provides better understanding of the drivers of risk capital thereby resulting in more efficient capital allocation.

In order to deliver greater consistency and completeness in the analysis and management of the risks and ensure exposures are reported in a coherent manner to form an aggregate risk profile, a set of Risk Management Policies ("the policies") supporting the framework has been adopted. These policies collectively outline the inherent risk, risk appetite and the minimum standards of control that the Manager is expected to maintain by taking into consideration of local regulatory requirements.

The Board of Directors ("the Board") of the Manager is ultimately responsible for the oversight role and accountability of the investment funds and has established Investment Committee ("IC") and Asset and Liability Committee ("ALCO") to oversee the investment activities.

10. FINANCIAL RISKS

(a) Market risk

This is the risk of security prices falling in response to general market conditions, as opposed to falling due to the activities of individual companies. It also includes adverse market conditions in overseas markets which may affect local markets and the Funds.

(i) Interest rate risk

Interest rate risk is a risk whereby increases in prevailing interest rates will cause fixed income securities held by a fund to decline in value and vice versa. This risk is mitigated by maintaining an appropriate mix of yield and maturity profiles.

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on excess of income over outgo before tax and net asset value. The correlation of variables will have a significant effect in determining the ultimate impact on interest rate risk but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

(a) Market risk (cont'd.)

(ii) Price risk

Price risk is a risk when price movements/fluctuations in the underlying values of securities of the investment portfolio will cause the net asset value or prices of units to fall as well as rise, and income produced by the Funds may also fluctuate. Price risk is mitigated by careful selection of securities as well as through diversification (spreading risk across a basket of multiple assets or sectors).

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on excess of income over outgo before tax and net asset value. The correlation of variables will have a significant effect in determining the ultimate impact on price risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis. It should be noted that movements in these variables are non-linear.

10. FINANCIAL RISKS (cont'd.)

(b) Credit risk

It is the risk of deterioration in the credit quality of issuers of fixed income instruments held by a fund. It comprises an issuer's ability to meet debt obligations and the consequent fall in the price of the affected securities which in turn would adversely affect the net asset value of the fund that invests in such securities.

A fund manages the exposure to individual counterparties, by measuring exposure against its individual limits and regulatory limits. These limits are governed by BNM and credit ratings issued by authorised rating agencies.

Each fund is only allowed to purchase corporate bonds of high credit standing (with minimum rating of AA) as rated by authorised rating agencies. The Manager also actively monitors and considers the risk of fall in the value of fixed interest securities from changes in the perceived credit worthiness of the issuer by conducting credit review and credit bond analysis on a regular basis.

Credit exposure by credit rating

The table below provides information regarding the credit risk exposure of the Funds by classifying assets according to the Funds' credit ratings of counterparties.

(c) Liquidity risk

Liquidity risk is defined as the ease with which a security can be sold at or near its fair value depending on the volume traded on the market or when a fund experiences large redemptions, where the Manager could be forced to sell large volumes of its holdings to meet redemption requirements.

If a fund has a large portfolio of securities that are less liquid or difficult to sell, the securities may be sold at a discount to its fair value, hence affecting the value of the fund. This liquidity risk is mitigated by investing in a mix of securities with satisfactory trading volumes and avoiding securities or markets with poor liquidity.

Liquidity risk is the risk where the Funds are unable to meet its obligations at reasonable cost or at any time. The Manager manages this risk by monitoring daily as well as monthly, projected and actual cash inflows/outflows and by ensuring that a reasonable amount of financial assets are kept in liquid instruments at all times. The Manager has a strong liquidity position and seeks to maintain sufficient financial resources to meet its obligations as they fall due.

Maturity profiles

The table below summarises the maturity profile of the financial assets and financial liabilities of the Funds into their relevant maturity groupings based on the remaining undiscounted contractual obligations.

Policyholders' liabilities are repayable or transferable on demand and are included in the "up to a year" column. Repayments which are subject to notice are treated as if notice were to be given immediately.

 Perutusan Ketua Pegawai Eksekutif

Para Pemegang Polisi Yang Dihargai,

Pada tahun 2011, kami telah menyusun semula asas dan dasar untuk CIMB Aviva, memberi tumpuan kepada pembangunan produk dan menambah baik perkhidmatan yang kami berikan kepada para pelanggan kami. Objektif utama kami adalah untuk memastikan kami sentiasa menyediakan nilai dan kepuasan pelanggan yang mampan setiap masa.

Beberapa produk baru telah dilancarkan – Pelan Ultimate Term (UTP) pada bulan Januari dan diikuti oleh versi Shariah pada bulan Ogos, Pelan Ultimate Term Takaful (UTTP). Kedua-duanya adalah pelan bertempoh yang menawarkan tahap perlindungan yang tinggi dengan kadar premium yang amat dimampui dan direka khas untuk pelanggan yang memiliki nilai bersih tinggi dan mewah.

Menjelang akhir tahun, kami telah memperluaskan rangkaian produk kami dengan melancarkan Pelan Ultimate Biz untuk segmen Perusahaan Kecil dan Sederhana (PKS). Produk ini mengambilkira pelbagai pendedahan risiko yang dihadapi oleh perniagaan PKS dan menawarkan perlindungan penyelesaian untuk hari ini dan persediaan untuk masa hadapan serta tumpuan ke atas kelangsungan perniagaan, perlindungan keluarga dan perlindungan pinjaman.

Sepanjang tahun 2011, syarikat telah melaksanakan penyusunan semula inisiatif utama untuk memperkasakan CIMB Aviva. Langkah pertama yang diambil ialah untuk mempertingkatkan nilai jenama kami agar kehadiran kami di Malaysia lebih teguh dan kukuh. Langkah ini dijangka akan berterusan sepanjang 2012.

CIMB Aviva menyokong sepenuhnya kepentingan sebagai warga korporat yang bertanggungjawab dan kami berpegang teguh pada tanggungjawab korporat (CR) kami di komuniti yang kami beroperasi. Kami mengiktiraf kepentingan sosial, ekonomi dan persekitaran yang mampan; kerana itulah program CR kami dibangunkan berdasarkan inisiatif global Aviva yang bertemakan "**Street to School**". Inisiatif global ini bertujuan untuk membantu kanak-kanak kurang bernasib baik mengelakkan kehidupan di jalanan dan kembali ke alam persekolahan agar mereka berpeluang menyerlahkan potensi mereka sepenuhnya.

Kerjasama kami dengan HOPE worldwide (KL) telah dimulakan pada April 2011 dan kami telah berjaya melaksanakan program yang mampu memberi manfaat kepada 235 kanak-kanak. Sebahagian besar kakitangan kami turut menyumbangkan khidmat mereka secara sukarela sepanjang tahun sebagai tanda sokongan ke atas inisiatif CR CIMB Aviva dan ini akan berterusan sepanjang tahun 2012. Program ini tertumpu kepada keperluan persekolahan, kerana kami percaya bahawa melalui pendidikan, kanak-kanak ini mampu memperolehi manfaat dalam tempoh jangka panjang.

 Perutusan Ketua Pegawai Eksekutif (samb.)

Melangkah ke hadapan

Kakitangan pengurusan kanan di CIMB Aviva telah menetapkan rangkaian keutamaan untuk terus menambah baik perniagaan, dan peningkatan nilai melalui pelan strategik yang jelas adalah kunci untuk menjayakan keutamaan ini. Walaupun mudah untuk dinyatakan, pelan yang disediakan memerlukan ketekunan dan kesungguhan, serta kepatuhan agar ia membawa kepada perubahan positif yang ketara dan berkekalan. Syarikat sentiasa mencari peluang untuk membina perkongsian baru serta membangunkan setiap jalinan kerjasama dengan sebaiknya dan prestasi kewangan dan operasi CIMB Aviva pada tahun 2011 telah membuka ruang untuk pertumbuhan yang lebih teguh. Matlamat kami adalah untuk mengekalkan pertumbuhan ini dengan menggabungkan kepakaran dan pengalaman luas berserta kemampuan kakitangan terbaik kami. Kami beriltizam untuk melakukannya sepanjang tahun 2012 dan tahun-tahun seterusnya berdasarkan pembangunan jangka panjang di dalam industri insurans.

Tahun lepas menyaksikan pemulihran ekonomi yang berterusan walaupun berhadapan dengan ketidakpastian dan perkembangan dunia yang agak bergelora. Kita melihat perubahan mengejut dan adakah tidak dijangka, didahului oleh keperlahan pasaran Eropah yang diimbangi oleh pertumbuhan di Asia dan pemulihran ekonomi di Amerika Syarikat. CIMB Aviva akan sentiasa mengadaptasi dan memahami semua perubahan ini untuk mengekalkan kemampanannya. Berikutkan unjuran ekonomi Malaysia yang positif, disokong oleh permintaan domestik yang kukuh dan inisiatif kerajaan untuk menjadikan Malaysia negara berpendapatan tinggi, kami yakin akan momentum ekonomi ke hadapan yang lebih cergas.

Kami mengakhiri tahun 2011 dengan lebih kukuh dan kami amat berterima kasih kepada sokongan dan keyakinan anda yang berterusan. Semoga tahun 2012 akan membawa lebih banyak kejayaan dan kecemerlangan kepada anda!

Ulasan Pasaran

Secara ringkasnya, pemulihan ekonomi global masih berterusan pada 2011 walaupun penyelesaian krisis hutang negara di Eropah masih diselubungi ketidakpastian. Bagaimanapun, kemelesetan pasaran Eropah telah dimampu oleh pertumbuhan Asia manakala ekonomi AS pula mengalami pemulihan yang agak ketara pada Q42011, hasil sokongan dasar kadar rendah oleh Federal Reserve AS.

Di dalam negara pula, perbelanjaan sektor swasta dan awam telah menyokong permintaan tempatan yang menggalakkan sekaligus membolehkan hasil keluaran dalam negara kasar (KDNK) Malaysia berkembang pada kadar 5.1% pada 2011 berbanding 7.2% pada 2010.

Semasa tahun di bawah ulasan, Kadar Dasar Semalamian (OPR) telah dinaikkan sebanyak 25 mata asas ke 3.00% pada 2011 berbanding 2.75% pada 2010 oleh Bank Negara Malaysia (BNM) semasa mesyuarat Jawatankuasa Dasar Monetari. Dalam tempoh yang sama, BNM juga telah menaikkan Keperluan Rizab Berkanun (SRR) dari 1.00% kepada 4.00% untuk mengurus dan mengimbangi semula kecairan di dalam pasaran. Ia dilakukan sejajar dengan peningkatan harga tenaga dan komoditi di mana Indeks Harga Pengguna (CPI) mencatatkan aliran kenaikan dari 2.4% pada bulan January kepada 3.0% pada bulan Disember serta mencatatkan purata 3.2% untuk tahun 2011.

Di pasaran ekuiti, FBM KLCI mengalami tahun yang agak tidak menentu pada 2011. FBM KLCI mencatatkan kenaikan 2.7% pada 1Q11 kepada 1,582 mata tetapi 3Q11 menyaksikan penurunan 12% kepada 1,393 mata akibat tekanan jualan besar-besaran untuk mengelakkan risiko yang berpunca dari program pembiayaan-semula hutang negara oleh Kesatuan Eropah serta berita mengenai penurunan penarafan kreditnya. FBM KLCI akhirnya pulih sedikit pada 4Q11 untuk mengakhiri tahun pada 1,503.7 mata hasil kerjasama positif yang berterusan dari sektor swasta dan kerajaan untuk meningkatkan pelaburan dan penggunaan domestik, sekaligus mencapai pertumbuhan yang memberangsangkan untuk 2011.

CIMB Aviva berpendapat bahawa kami tidak menjangkakan sebarang peningkatan ketara pada CPI Malaysia walaupun harga makanan masih menjadi isu utama, manakala kadar faedah pula dijangka kekal sederhana pada 2012. Berdasarkan pergerakan dalam portfolio pelaburan, pasaran bon domestik diramalkan akan kekal tidak menentu sepanjang tahun. Di Bursa Malaysia, prestasi FBM KLCI dijangka akan dimangkin oleh aliran berita penggabungan dan pengambilalihan, Program Transformasi Ekonomi (ETP) dan pilihanraya umum ke-13 yang bakal diadakan di Malaysia.

9. PENGURUSAN RISIKO

Pengurus telah menggubal satu rangka kerja pengurusan risiko yang komprehensif dan bersepada (“rangka kerja”) serta metodologi dalam menguruskan risiko dan peluang. Rangka kerja ini yang diterap daripada Aviva Group, dicipta untuk menyokong pengenalpastian, penilaian, pemantauan dan pengawalan risiko-risiko ketara dan menterjemahkan kesannya ke atas perolehan dan modal. Papan pemuka risiko disepadukan ke dalam rangka kerja untuk menyediakan tinjauan terhadap pendedahan risiko Dana secara menyeluruh. Rangka kerja menyediakan pemahaman yang lebih baik terhadap pemacu risiko modal sekaligus menghasilkan peruntukan modal yang lebih efisien.

Untuk memberikan analisis dan pengurusan risiko yang lebih konsisten dan lengkap, serta memastikan pendedahan dilaporkan secara bersepada untuk membentuk agregat profil risiko, satu set Dasar-dasar Pengurusan Risiko (“dasar-dasar”) yang menyokong rangka kerja tersebut telah diterapkan. Dasar-dasar ini membentuk garis panduan risiko bawaan, ketahanan risiko dan standard kawalan minimum secara kolektif yang perlu diuruskan oleh Pengurus dengan mengambilkira keperluan kawal selia tempatan.

Lembaga Pengarah (“Pengarah”) Pengurus bertanggungjawab secara mutlak memegang peranan pengawasan dan kebertanggungjawaban ke atas dana-dana pelaburan dan telah menubuhkan Jawatankuasa Pelaburan (“IC”) dan Jawatankuasa Aset dan Liabiliti (“ALCO”) untuk menyelia akitiviti-aktiviti pelaburan.

10. RISIKO KEWANGAN

(a) Risiko pasaran

Ia adalah risiko kejatuhan harga sekuriti sebagai reaksi balas terhadap keadaan pasaran secara am, berbanding kejatuhan akibat aktiviti syarikat tersebut. Ia merangkumi keadaan pasaran kurang baik di pasaran luar negara yang mungkin memberi kesan kepada pasaran tempatan dan Dana.

(i) Risiko kadar faedah

Risiko kadar faedah adalah risiko di mana peningkatan kadar faedah semasa boleh menyebabkan sekuriti pendapatan tetap yang dipegang oleh sesebuah dana mengalami kejatuhan nilai dan sebaliknya. Risiko ini boleh dikurangkan dengan mengekalkan campuran profil perolehan dan kematangan yang sewajarnya.

Analisa di bawah dilaksanakan untuk memastikan perubahan yang mungkin berlaku pada pembolehubah utama serta pembolehubah lain yang dipegang kekal tetap, menunjukkan kesan ke atas lebihan pendapatan berbanding perbelanjaan sebelum cukai dan nilai aset bersih. Hubungkait pembolehubah akan mempunyai kesan ketara di dalam menentukan impak muktamad ke atas risiko kadar faedah tetapi untuk menunjukkan kesan akibat perubahan pembolehubah, pembolehubah tersebut perlu ditukar atas dasar setiap satu. Perlu diberi perhatian bahawa perubahan pada pembolehubah berikut adalah secara bukan-linear.

(ii) Risiko harga

Risiko harga adalah risiko apabila perubahan/turun-naik harga nilai asas sekuriti di dalam portfolio pelaburan akan menyebabkan nilai aset bersih atau harga unit jatuh serta naik, dan pendapatan yang dihasilkan oleh Dana juga turut turun-naik. Risiko harga dapat dikurangkan melalui pemilihan sekuriti yang lebih teliti serta kepelbagaian (menyebarluaskan risiko kepada beberapa kumpulan aset atau sektor).

Analisa di bawah dilaksanakan untuk memastikan perubahan yang mungkin berlaku pada pembolehubah utama serta pembolehubah lain yang dipegang kekal tetap, menunjukkan kesan ke atas lebihan pendapatan berbanding perbelanjaan sebelum cukai dan nilai aset bersih. Hubungkait pembolehubah akan mempunyai kesan ketara di dalam menentukan impak muktamad ke atas risiko harga tetapi untuk menunjukkan kesan akibat perubahan pembolehubah, pembolehubah tersebut perlu ditukar atas dasar setiap satu. 10. RISIKO KEWANGAN (samb.)

(b) Risiko kredit

Ia adalah risiko kemerosotan dalam kualiti kredit penerbit instrumen pendapatan tetap yang dipegang oleh sesebuah dana. Ia merangkumi keupayaan penerbit untuk memenuhi kewajipan hutang dan seterusnya kejatuhan harga sekuriti berkenaan yang boleh memberi kesan ketara kepada nilai aset bersih dan dana yang melabur di dalam sekuriti tersebut.

Sesebuah dana menguruskan pendedahan kepada pihak berlainan, dengan mengukur pendedahan berbanding had persendirianya dan had kawal selia. Had-had ini dikawal selia oleh BNM dan penarafan kredit yang diterbitkan oleh agensi penarafan yang dibenarkan.

Setiap dana hanya dibenarkan untuk membeli bon korporat dengan kedudukan kredit tinggi (dengan penarafan minimum AA) sebagaimana ditarafkan oleh agensi penarafan yang dibenarkan. Pengurus juga memantau secara aktif dan mempertimbangkan risiko kejatuhan nilai sekuriti faedah tetap akibat perubahan pada nilai kredit penerbit melalui pelaksanaan semakan kredit dan analisa bon kredit secara kerap.

(c) Risiko kecairan

Risiko kecairan ditakrifkan sebagai sekuriti yang mudah dijual pada atau menghampiri nilai saksamanya bergantung kepada jumlah yang didagangkan di pasaran atau apabila dana mengalami penебusان yang besar, di mana Pengurus boleh dipaksa untuk menjual sejumlah besar pegangannya untuk memenuhi keperluan penебusان.

Jika sesebuah dana memiliki portfolio besar sekuriti yang kurang cair atau sukar dijual, sekuriti tersebut mungkin perlu dijual pada diskaun berbanding nilai saksamanya, sekaligus menjejaskan nilai dana. Risiko kecairan boleh dikurangkan melalui pelaburan di dalam sekuriti campuran dengan jumlah dagangan yang memuaskan dan mengelak daripada sekuriti atau pasaran yang berkecairan rendah.

Risiko kecairan adalah risiko di mana Dana tidak berupaya untuk memenuhi tanggungjawabnya pada kos yang munasabah pada bila-bila masa. Pengurus menguruskan risiko ini melalui pemantauan harian serta bulanan, unjuran dan aliran sebenar kemasukan/pengeluaran tunai, dan dengan memastikan bahawa terdapat amaun aset kewangan yang sewajarnya disimpan dalam bentuk instrumen cair setiap masa. Pengurus mempunyai kedudukan kecairan yang kukuh dan menyasarkan untuk mengekalkan sumber kewangan yang mencukupi untuk memenuhi tanggungjawabnya apabila diperlukan.

Profil kematangan

Jadual di bawah adalah ringkasan profil kematangan untuk aset kewangan dan liabiliti kewangan Dana ke dalam kumpulan kematangan mereka yang berkaitan berdasarkan baki tanggungjawab berkontrak tidak didiskaun.

Liabiliti pemegang polisi perlu dibayar atau dipindahkan apabila dituntut dan termasuk di dalam kolumn "sehingga satu tahun". Pembayaran balik yang tertakluk kepada notis pemberitahuan dianggap sebagai telah diberikan notis pemberitahuan serta-merta.
