**FUND MANAGER'S COMMENTS**

**Equity**

Weak selection in consumer discretionary, information technology and communication services was modestly offset by selection in consumer staples. On a regional basis, weak stock selection in Emerging Markets and Developed EU Middle East ex UK was modestly offset by selection in United Kingdom and Japan. Within consumer staples and energy, our top relative contributors were overweights to Mondelez and Tourmaline Oil, respectively. Within consumer discretionary and information technology, our top relative detractors were overweights to Amazon.com and Advanced Micro Devices, respectively. The share price of Mondelez, a US based global snack food company with well-known brands including Oreo, Ritz, and Sour Patch Kids, rose in April after management reported strong 1 Q 22 results including 9 organic sales growth. Notably, growth was broad based geographically and category wise supported by strong ad spending. Shares of Amazon fell after the company reported its first quarterly loss in seven years and slowest ever quarterly revenue growth. The e-commerce giant is grappling with inflation and supply chain problems. According to management, major investments in warehouses and staff during the coronavirus pandemic were catching up with the company, as uncertainty grows about consumer spending.

**Sukuk**

Portfolio is outperforming due to government related sector. We will continue re-evaluate our portfolio strategy to ensure further outperforming the portfolio as sukuk supply continues to dominate the market. Our credit exposure, GCC region accounted by 46%, included by Saudi Arabia (SA) (20%), United Arab Emirates (UAE) (20%), Qatar (5%) and Kuwait (1%). Our exposure in Malaysia increase to 40 while Indonesia decrease to 14%.

**RISKS**

All investment carries some form of risks. The potential key risks include but are not limited to the following:

<b>General market environment Risk</b>	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
<b>Inflation Risk</b>	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Manager's Risk</b>	This risk refers to the day-to-day management of the target fund by UOBAM which will impact the performance of the target fund, e.g. investment decisions undertaken by UOBAM as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weakness in operational process and systems may adversely affect the performance of the target fund.
<b>Reclassification of Shariah non-compliant status Risk</b>	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser or the Shariah boards of the relevant Islamic indices. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the target fund. Thus, it may cause the NAV of the target fund to fall.
<b>Credit and Default Risk</b>	<p>Credit risk relates to the creditworthiness of the issuers of Sukuk, Islamic money market instruments and/or financial institutions where the Islamic deposits are placed and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer of the Sukuk, Islamic money market instruments and /or financial institutions where the Islamic deposits are placed may impact the value as well as liquidity of the Sukuk, Islamic money market instruments and/or Islamic deposits. In the case of rated Sukuk, Islamic money market instruments and financial institutions, this may lead to a credit downgrade.</p> <p>Default risk relates to the risk that an issuer of a Sukuk, Islamic money market instrument or a financial institution where the Islamic deposits are placed either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk, Islamic money market instruments and Islamic deposits. This could adversely affect the NAV of the target fund.</p>
<b>Interest Rate Risk</b>	Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and/or Islamic money market instruments. When interest rates rise, Sukuk and/or Islamic money market instruments prices generally decline and this may lower the market value of the target fund's investment in Sukuk and/or Islamic money market instruments. The reverse may apply when interest rates fall. Meanwhile, Sukuk and/or Islamic money market instruments with longer maturities and lower profit rates are more sensitive to interest rate changes.

**RISKS (CONTINUED)**

**Equity Risk**

As the target fund will be investing in Shariah-compliant equities, the target fund will be affected by equity risk. Generally, equity risk may arise in the following forms, i.e., equity risks related to external factors and equity risks related to company-specific factors. All of these related equity risks can adversely affect the prices of equities, which would negatively impact the performance of the target fund.

**Country Risk**

The target fund is also subject to country risk. The value of the assets of the target fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the target fund may invest in. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place.
