#### FUND MANAGER'S COMMENTS

In October 2017, the Fund increased 4.90%, underperforming the benchmark by 57 basis points. We are Overweight in India and Hong Kong and Underweight Korea, Taiwan and Malaysia. In sector terms, we are Overweight Industrials and Telecommunications and Underweight Consumer Services, Utilities and Health Care. Year-to-date, the fund is up 26.94%.

Asian Equities rose 3% in US\$ terms in October 2017. The rally was more broad-based with health care, staples, technology, energy and financials outperforming. Topical issues were: will the US tax reform happen?, can oil prices stay above US\$50 sustainably? Is the recent surge of initial public offerings (IPOs) a sign of a market top? Given how well markets have done (+35% year-to-date) and the raft of IPO offerings of varying quality, there could be a pause in performance in the short term. However, we remain constructive on the longer term with global growth accelerating, commodity prices firming up and China's Producer Price Index ought to be in positive territory. This is generally positive for Asian equities.

For 2018, Asian equities will be driven by a broader set of companies delivering earnings growth of approximately 12%, higher return on equity, and reasonable valuations at 13x FY2018 price-earnings ratio. The Fund is invested in beneficiaries of India's structural growth and reforms, oligopolistic technology component manufacturers, internet platform companies and selected telecommunication companies in countries where data consumption is burgeoning.
