FUND MANAGER'S COMMENTS

In January 2017, the Fund increased 3.22%, underperforming the benchmark by 203 basis points. We were overweight in India, Indonesia and Philippines and underweight in Korea and Taiwan. Sector-wise, we were overweight in Oil & Gas and Telecommunications and underweight in Technology and Utilities.

Asian Equities was up 6% in United States Dollar terms in January 2017. All sectors were up by almost the same magnitude save materials which outperformed (+11%). Country-wise, Indonesian equities and the Rupiah was the notable underperformer.

The fund has added certain cyclical stocks on market weakness and trimmed stocks of companies which we think will have weak prospects. The fund remain buyers of the markets, especially on dips, and intend to be fully invested. In terms of portfolio construction, the fund adopts a sector-neutral approach, with focus on stock-selection as the primary driver of alpha. Special focus is on stock ideas related to e-commerce, sharing economies, energy and basic materials. For country exposure, we like India and Indonesia for the recovery in the rural economies; as well China as growth stabilizes in the near term even as we see spotted success in the country's industrial transformation to the new economy. The fund intends to be 90% invested with a beta of 1.0. Focus will be on stocks with good earnings growth and strong cashflow generation.
