## FUND MANAGER’S COMMENTS

The Fund rose by 1.57% in November 2020, outperforming the benchmark by 0.16%. Year-to-date (YTD), the fund has underperformed the Benchmark by 2.13%. The Fund will stay fully invested in target funds.

The global oil market surged on vaccine hopes but a return to pre-crisis oil market fundamentals is some time away. The pandemic meanwhile accelerates the energy transition aided by a wide set of policy support and stimulus measures. Crude oil climbed to its highest level since early March on optimism surrounding the vaccine announcements, with sentiment also boosted by US election results. Oil futures turned into backwardation to reflect tighter conditions. Vaccines improve the economic outlook and future oil demand over the 2- to 3-year horizon but are unlikely to boost demand significantly in the near-term. Rising commodity prices, particularly oil and gas and palm oil, will bode well for Malaysia as these sectors are the major exports and consumption pillars for the country.

The approval of 2021 Budget by the Parliament was the biggest short-term positive development that would help to alleviate political risk in Malaysia. Despite noises of a possible no confidence vote against the Prime Minister and the Budget 2021, it was passed smoothly and all measures will be implemented in 2021. With major headwinds (US Presidential Election and Malaysia Budget 2021) are now being addressed and cheap valuations, we are now cautiously optimistic for 1H2021. Earlier hope for rapid recovery in 4Q2020 may be dented (due to resurgence of COVID-19 globally) but we are now confident of a sustainable economic recovery in 1H2021. As a result, for equity strategy, we will continue with our high Asset Allocation and focusing on post Covid19 recovery theme. Sector in focus for will be on Consumer, Technology and Commodity-related (weakening of USD), whilst at the same time reducing our position on the Healthcare and REIT sectors.

For MYR Sukuk strategy, as we approach the last quarter and market have turned more cautious, we recommend taking profit and lighten some positions in the sovereign segment especially on the shorter part of the curve and move to Corporate Sukuk for better yield pick-up. Any sell off in the market is opportunity to buy as yields are expected to stay range bound. We continue to selectively participate in the Corporate Sukuk with strong and stable fundamentals.

## RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

<b>Returns not guaranteed</b>	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
<b>General market environment risk</b>	Market risk refers to the possibility that a Shariah-compliant investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
<b>Inflation risk</b>	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Manager's risk</b>	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market may adversely affect the performance of the fund.
<b>Financing risk</b>	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
<b>Reclassification of Shariah status risk</b>	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, Shariah adviser of the issuer, the Shariah Adviser or the Shariah boards of the relevant Islamic indices.
<b>Risk associated with investing in Islamic CIS</b>	Since the Fund will invest entirely into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of this Fund.

**RISKS (CONTINUED)**

**Country risk**

The Fund may invest into Islamic CIS which can be domiciled in various countries. Therefore, the Fund will be subjected to risks specific to the countries in which the Islamic CIS are domiciled in. Such risks include adverse changes in economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may be an adverse impact on the prices of the Islamic CIS, which will depress the Islamic CIS's NAV growth, and consequently depress the Fund's NAV growth.

**Currency risk**

As the Fund may invest into Islamic CIS denominated in currencies other than MYR, any fluctuation in the exchange rate between MYR and the currencies in which the Islamic CIS are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the Islamic CIS are denominated depreciate against MYR, this will have an adverse effect on the NAV of the Fund in MYR and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
