FUND MANAGER'S COMMENTS

Equity

Weak selection in consumer staples, materials and consumer discretionary was partially offset by selection in information technology, health care and energy. On a regional basis, strong stock selection in Japan and United Kingdom was partially offset by selection in Emerging Markets Within information technology and energy, our top relative contributors were an underweight to NVIDIA and an overweight to ConocoPhillips, respectively. Within consumer discretionary and materials, our top relative detractors were not owning Alibaba and an overweight to Ball, respectively. Shares of NVIDIA fell during the period after the chipmaker announced a fiscal second quarter revenue forecast that was far lower than an earlier estimate due to a weaker outlook in the gaming industry. The company expects revenue of 6.7 billion compared to an earlier outlook of 8.1 billion. Shares of Alibaba rose after the company reported first quarter revenue above expectations despite it declining for the first time on record amid COVID related lockdowns and slowing economic growth. Later in the period, reports emerged the US and China were close to a deal to enable US regulators to inspect the audit records of Chinese companies to avoid US delisting.

Sukuk

Sukuk sleeves continue to outperform the benchmark and continue to contribute positively to UiGBF fund overall. Superior stocks and sector selection drove the outperformance. Government agency and Government Regional outperformed the relative benchmark by close to 11 bps versus the benchmark. The outperformance, however were offset by Utilities and Government National sector selection. Our credit exposure, GCC region accounted by 44.83% included by Saudi Arabia (SA) (20.09%), United Arab Emirates (UAE) (20.72%), Qatar (4.03%) and Kuwait (1.22%). Our exposure in Malaysia and Indonesia are remains on 38.5% and 15.08% respectively.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

General market environment Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation Risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's Risk	This risk refers to the day-to-day management of the target fund by UOBAM which will impact the performance of the target fund, e.g. investment decisions undertaken by UOBAM as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weakness in operational process and systems may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status Risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser or the Shariah boards of the relevant Islamic indices. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the target fund. Thus, it may cause the NAV of the target fund to fall.
Credit and Default Risk	<p>Credit risk relates to the creditworthiness of the issuers of Sukuk, Islamic money market instruments and/or financial institutions where the Islamic deposits are placed and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer of the Sukuk, Islamic money market instruments and /or financial institutions where the Islamic deposits are placed may impact the value as well as liquidity of the Sukuk, Islamic money market instruments and/or Islamic deposits. In the case of rated Sukuk, Islamic money market instruments and financial institutions, this may lead to a credit downgrade.</p> <p>Default risk relates to the risk that an issuer of a Sukuk, Islamic money market instrument or a financial institution where the Islamic deposits are placed either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk, Islamic money market instruments and Islamic deposits. This could adversely affect the NAV of the target fund.</p>
Interest Rate Risk	Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and/or Islamic money market instruments. When interest rates rise, Sukuk and/or Islamic money market instruments prices generally decline and this may lower the market value of the target fund's investment in Sukuk and/or Islamic money market instruments. The reverse may apply when interest rates fall. Meanwhile, Sukuk and/or Islamic money market instruments with longer maturities and lower profit rates are more sensitive to interest rate changes.

RISKS (CONTINUED)

Equity Risk

As the target fund will be investing in Shariah-compliant equities, the target fund will be affected by equity risk. Generally, equity risk may arise in the following forms, i.e., equity risks related to external factors and equity risks related to company-specific factors. All of these related equity risks can adversely affect the prices of equities, which would negatively impact the performance of the target fund.

Country Risk

The target fund is also subject to country risk. The value of the assets of the target fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the target fund may invest in. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place.
