FUND MANAGER'S COMMENTS

The Fund delivered 0.25% in September 2024, and delivered 3.25 % in the 12-months period ending 30 September 2024.

BNM kept the OPR unchanged at 3.00% at its September meeting. The MPC noted that the current rate is supportive of economic growth and aligns with their inflation and growth outlook. They emphasized a neutral monetary stance but remain watchful of domestic and inflationary trends heading into 2025. The MPC's assessment on growth outlook continues to see upside from global tech upcycle, robust tourist spending and faster investment project implementation, while the downside risk to growth comes mainly from external demand.

In August 2024, the headline inflation rate moderated to 1.9% YoY, slightly down from 2.0% in July. For the first eight months of 2024, inflation averaged 1.8%, compared to 2.5% for the whole of 2023. The broadening of the services tax base and its rate increase from 6% to a range of 6%-8% had a mild impact on services inflation, which remained at 2.2% YoY. Additionally, adjustments in diesel prices in Peninsular Malaysia had a muted effect on inflation so far.

The unemployment rate remained steady at 3.3% in July 2024, the same as the previous month. The number of unemployed persons decreased slightly by 0.3%, reflecting a stable labor market. This stability is supported by continuous economic growth, with sectors such as services, manufacturing, and construction showing positive employment trends.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
