FUND MANAGER'S COMMENTS

- The local market treaded water with the FBM Top 100 Index barely unchanged at 0.71% in October, amidst lacklustre earnings and a lack of catalysts.
- The Budget 2020 tabled earlier this October was market neutral, balancing the need for fiscal discipline while also remaining expansionary, with potential beneficiaries such as the consumer and technology sector.
- The Malaysian government is planning to focus on attracting foreign direct investments and incentives to attract large multi-national corporations to set-up operations in Malaysia. The move is intended to create supporting industries that will boost job creation and aid development of the SME segment as an important pillar of the economy.
- The government revised its Budget 2020 deficit target to 3.2% of GDP, which is slightly higher than the 3.0% originally announced in Budget 2019.
- **STRATEGY:** Over the month, the fund's invested levels were maintained between 80% and 90%. The fund remains positioned with value companies and quality large-cap Shariah-compliant stocks in the domestic market.
- Over the month, the fund added exposure into the defensive sector, namely REITs, and cyclical sectors such as oil & gas and technology. The fund's portfolio comprises 30%-35% exposure in sectoral growth; and 10% in tactical positions.
- The fund remains cautious due to geopolitical fragility and macro uncertainties in the world which raises recessionary concerns.
