FUND MANAGER’S COMMENTS

The Fund fell by 0.90% in September 2018, outperforming the benchmark by 0.97%.

September saw the FBMS succumbed to selling pressure as investors locked in gains made in the previous month on worries that the US\$200bn trade tariffs imposed on China may impact global growth and EM currencies. The downtrend was exacerbated further by the financial crisis in Argentina which led investors to flee the peso causing worry of a contagion effect in emerging markets. Sentiment in the local bourses was further affected by the announcement of the cancellation of 3 China-backed projects (the ECRL and the 2 gas pipeline projects estimated at US\$23bn) and the deferment of HSR to 2020 September, which sent the Construction Index tumbling by 5.38% M-o-M. Islamic Asia ex-Japan equities declined 2.5% (US\$) in Sept, with the Chinese market stabilizing despite US levying 10% tariffs on additional US\$200bn worth of goods. However, sentiment toward other emerging markets deteriorated as asset classes in countries with twin deficits such as India, Indonesia and Philippines fallen the most.

We are cautious on the equity market, going into 4Q2018. US-China trade conflicts have intensified and will persist for longer than earlier expected. Domestically, investors will be waiting for the upcoming budget in November to get a glimpse of the future fiscal and monetary policies for the country. We are expecting a prudent budget by the PH Government with private sector taking the lead role in generating economic growth. ON the back of all these uncertainties, we reiterated our capital preservation investment strategy with preference on big cap GLCs and companies with strong fundamentals and solid cash flow and dividends in sectors such as Utilities & Renewable Energy and Industrials. We are also positive on Exporters as US-China trade conflicts may benefit technology-related and Electronics Manufacturing Services (“EMS”) players in Malaysia.
