## FUND MANAGER'S COMMENTS

In February 2016, the Fund was up 0.75%, underperforming the benchmark by 0.25%. We are overweight in Hong Kong and Indonesia, and underweight in Korea, Taiwan and Malaysia. Sector-wise, we are overweight in telecommunications, financials and consumer services and underweight in oil & gas, technology, industrials, basic materials and utilities.

Asian equities fell 1% in February (US Dollar terms) with the best & worst performers being ASEAN and India respectively. Topical issues were: has the US Dollar peaked and oil prices bottomed; can China avoid a crisis and muddle through; will continued monetary easing be effective given the recent impact on banks (e.g., European & Japanese banks) and growth?

We are currently Neutral on Asian equities but with the intent to accumulate stocks opportunistically as markets remain volatile. We prefer ASEAN to China, as longer term demographics are more favourable, and returns on investment are higher. We see opportunities in Information Technology, Consumers, Telecoms and selected Industrials.

### Disclaimer:

The benchmark performance is not a guide to future performances which may differ. The performance of the fund is not guaranteed. The value of the fund will fluctuate and may fall below the amount of premiums paid and the fund value depends on the actual performance on the underlying investment.

Any income distribution from the underlying assets of the investment-linked fund will be automatically reinvested into the respective investment-linked fund. The policy owner's total number of units will not change as a result of the reinvestment.
