FUND MANAGER'S COMMENTS

Market review:

- In June, the FTSE Bursa Malaysia Kuala Lumpur Composite Index (FBMKLCI) continued to succumb to heavy foreign selling, falling 2.8% or 49 points to close at 1,691 points, as investors repriced policy risk. On a year-to-date basis, the FBKMLCI has lost 5.9%. Foreigners net sold RM4.9bn, bringing the 6M2018 total net foreign outflows to RM6.8bn vs. a net inflow of RM10.8bn in 2017. During the month, the Ringgit depreciated further by 1.47% to RM4.04/USD, the 10Y MGS rose 2bps to 4.20%, while Brent crude oil gained 2.4% to USD79.44 per barrel.
- The market was rattled by continuous news flow on 1MDB and policy overhang on some of the mega projects like ECRL, MRT3 and HSR. Telcos and Banks underperformed due to fear of lower broadband charges and re-pricing of risk arising from expectation of a slower GDP in 2018 and 2019 respectively. Sentiment was further dampened by the weak first quarter corporate earnings season. Meanwhile, on the global front, trade tensions have intensified.

Portfolio strategy:

- We expect the Malaysia equity market to remain volatile in 2H2018 given a more challenging macro backdrop. Developments in the local front will also remain fluid especially with respect to the changes of GLC management team and the government's fiscal management. Although we remain fairly defensive and cashed up in the last 2 months, we are cognisant of the fact that: Buy-side positioning remains too bearish; valuations at selective sectors remain quite compelling; and there is risk that global outflows from emerging markets may be at a tail end in the short term. As a result, we have turned more Neutral on Malaysian equities and we will start to deploy cash gradually into quality names with reasonable risk/reward profiles during market retracements. We continue to prefer big cap companies with strong fundamentals in sectors such as Banks, Consumer, Technology and Industrials.
