FUND MANAGER'S COMMENTS

For the month of October 2017, the Fund gained 1.84%, outperforming the benchmark by 1.51%.

In October, the FTSE Bursa Malaysia Kuala Lumpur Composite Index ("FBMKLCI") fell 7.66 points or 0.44% to 1,747.92 points. We saw net foreign outflows of RM0.3 billion, the third consecutive month of outflows. Year-to-date, net foreign inflows are RM9.8 billion, compared with RM3.2 billion outflows in 2016. Brent touched a high of USD61.37/barrel on 31 October, while the Ringgit closed at RM4.23. As expected, Budget 2018, tabled on 27 October, was both expansionary and people-centric. Fiscal discipline was maintained as shown by a smaller deficit target of 2.8% for 2018 from 3.0% this year.

Market continued to drift lower in October. Thus far, global economic data have supported our view of better economic growth in 2018. For our 2018 strategy, we remain positive on the market and will continue to buy on dips on the back of 7% earnings growth forecast. We keep to our key broad themes, with specific focus within each theme, i.e. construction (infrastructure plays, affordable housing), e-commerce/logistics (regional e-fulfillment hub, online payment), Chinese tourism (airport, airline, consumer products), consumer sector (discretionary, durables, personal financing) and technology (smart factory in a rising cost environment, connectivity). Our base case is that there is no political upheaval arising from the 14th General Election expected in the first quarter of 2018.

The Malaysia Government Securities ("MGS") yield curve bear steepened in October taking cue from weakened US Treasuries amid optimism over the progress of tax reforms and the imminent appointment of the next Fed Chair. Bond yields were pressured along the curve and the market was seen in a trimming mode.

Meanwhile, Malaysia's recently tabled Budget 2018 was supportive of growth while still remain focused on fiscal consolidation. The budget is seen to be slight expansionary taking into considerations of the individual tax cuts alongside a host of cash handouts that will boost private consumption. Consequently, the 2018 budget should be able to deliver the expected real GDP growth of 5.0 – 5.5% and meet the fiscal deficit of 2.8% of GDP. Meanwhile, BNM is expected to keep its policy rate unchanged in its next MPC meeting on 9 November.

We continue to remain fully invested with focus on selective primary corporate bond issuance and exposure into the government securities when the opportunity arises.
