FUND MANAGER’S COMMENTS

The Fund delivered 0.28% in the month of April 2023, which was outperforming the benchmark by 6bps and delivered 2.65% in the 12-months period ending 28 April 2023, outperforming the benchmark by 16bps.

Malaysia’s headline inflation decelerated for the seventh straight month as it came in at +3.4% in March (from 3.7% in February; Consensus: 3.6%). March’s reading represented the weakest inflation rate since June 2022. The moderation was primarily driven by slower increase in prices for food and non-alcoholic beverages. In addition to this, the price pressures for housing and utilities also softened. Malaysia’s Industrial Production Index (IPI) improved to 3.6% YoY in February after recording a modest growth of only 1.8% YoY in January. The expansion in February was spearheaded by the manufacturing sector which rose by 4.9% and the electricity sector which rose by 1.1%. However, the mining sector output declined marginally by 0.5% in February after registering positive growth for 8 consecutive months. Malaysia’s total trade in March declined -1.6% YoY to RM237.2 billion amid a contraction in both exports and imports with major trading partners. Exports were down by -1.4% YoY while imports declined by -1.8% YoY. For Q12023, trade grew 3.2% to RM644.9 billion compared to Q12022. However, Malaysia’s trade surplus in March widened to RM26.69bil, its highest on record for the month. There was a decline across Malaysia’s exports by sector in March. The decline was partially offset by higher exports of petroleum products, optical and scientific equipment as well as machinery, equipment and parts.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
