FUND MANAGER'S COMMENTS

For the month, the fund fell 0.82% but outperformed its benchmark by 1.53%. On year-to-date, 1-Year, 3-Year and since inception basis, the fund also outperformed the benchmark by 7.01%, 6.57% and 3.36% respectively.

Market saw another heavy sell-off in May where FBM Emas Shariah Index fell 2.35%. The sell-off in Malaysia equities was attributable to (i) a very weak 1QFY2016 corporate earning result where the reported market EPS growth was -25% from consensus' expectation. 33% of total listed companies had reported a loss 1Q2016. Total revenue and net profit growth was -2% yoy and -19% yoy respectively (ii) a surprise MSCI downgrading of Malaysia's weighting in the emerging market index. Malaysia's weighting was reduced from 3.36% to 3.09% or effectively an absolute 8% drop in Malaysia's country weighting.

Given the disappointing 1Q corporate earnings, we continue to remain defensive in our portfolio with a high level of cash. On stock selection, we maintain the overweight positions in ports, healthcare, utilities and construction sectors.
