## FUND MANAGER’S COMMENTS

The Fund delivered 0.13% in the month of June 2021, slightly below the benchmark by 1bp, and delivered 1.58% in the 12-months period ending 30 June 2021, underperforming the benchmark by 17bps.

In mid-June, the Government introduced the National Recovery Plan (NRP) outlining the roadmap to transition from the current lockdown (Phase 1) to the exit phases (Phase 2 - 4). In early-July, the Government eventually relaxed the restrictions for Kelantan, Terengganu, Pahang, Perak, Perlis and Penang to transition into Phase 2, given that these states have met the threshold. However, an Enhanced Movement Control Order (EMCO) was imposed on most parts of Selangor and Kuala Lumpur from 3 - 16 July, with stricter movements on affected areas.

The Government also announced an additional RM150bio PEMULIH stimulus package (10.6% of 2020 GDP) that includes RM10bio (0.7% of 2020 GDP) of direct fiscal injection - which includes one-off cash assistance to the affected B40/M40 groups; Wage Subsidy Programme 4.0 as well as one-off grants to micro and SME businesses. Bulk of the stimulus come from other “off-budget” measures, such as the six-month (opt-in) loan moratorium which is expected to be ~RM80bio for individual and business borrowers; the new RM30bio EPF i-Citra withdrawal scheme; and extra RM20bio in Government guarantees for SME financing. MoF expects the PEMULIH stimulus to provide an additional 2% uplift to Malaysia’s GDP growth. Nevertheless, MoF highlighted that Malaysia’s 2020 GDP forecast would still have to be revised downwards and will be announced in mid-August. World Bank revised Malaysia’s 2021 GDP growth forecast downwards to 4.5% (from 6% earlier).

BNM kept policy rate unchanged in the May-2021 meeting, with assessment of overall growth trajectory, current policy stance, and outlook for policy broadly similar to March-2021. However, with pandemic-related headwinds stronger than initial assumptions, policy action may be required in the next meeting. We believe that BNM is likely to keep its OPR at 1.75% for the time being as they deem the current monetary policies to be accommodative to support the recovery.

We limit our investment exposure to short-term Islamic deposit placements due to the very low risk nature of the Fund.

## RISKS

<b>Returns not guaranteed</b>	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
<b>General market environment risk</b>	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
<b>Inflation risk</b>	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Financing risk</b>	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
<b>Manager's risk</b>	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
<b>Reclassification of Shariah non-compliant status risk</b>	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
<b>Credit and default risk</b>	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
