FUND MANAGER’S COMMENTS

The Fund delivered 0.29% in the month of March 2023, which was outperforming the benchmark by 6 bps and delivered 2.51% in the 12-months period ending 31 March 2023, outperforming the benchmark by 10 bps.

Bank Negara Malaysia (“BNM”) held its Overnight Policy Rate (“OPR”) at 2.75% at its March Monetary Policy Committee (“MPC”) meeting, as they continued to assess the impact of the prior OPR adjustments in 2022. BNM highlighted that the current stance remains accommodative and supportive of economic growth, while not being on any preset path on monetary policy.

Malaysia’s headline and core inflation remained sticky in February, coming in at +3.7% YoY (cons: +3.6%; prior: +3.7%) and +3.9% YoY (prior: +3.9%), respectively. Food and non-alcoholic beverages (+7.0% YoY) and restaurants & hotels (+7.4% YoY) were the main culprits, while there was a slight ease in transportation costs (+3.7% YoY). Domestic policy on price subsidy/controls remains fluid for now, as we expect more to be announced in the 2H2023 - post state elections.

Malaysia’s Industrial Production Index moderated in January at +1.8% YoY (cons: +2.3%; prior: +2.8%) as subdued manufacturing and decline in electricity outweighed the pickup in mining output. Meanwhile, exports and imports growth accelerated to +9.8% YoY and +12.4% YoY, respectively, in February with trade surplus widening to RM19.6 billion (prior: RM18.1 billion) - but is expected to slow amid the weaker global growth in 2023.

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
