## FUND MANAGER'S COMMENTS

The Fund delivered 0.26% in December 2024 which was equally performed the benchmark and delivered 3.59% in the 12-months period ending 31 December 2024, outperforming the benchmark by 51bps.

In November, headline inflation declined to 1.8% (October 2024: 1.9%), while core inflation remained stable at 1.8% (October 2024: 1.8%). The lower headline inflation was largely due to a continued downtrend in mobile communication services inflation, which declined to -11.4% (October 2024: -5.2%) during the month. This was partly offset by higher inflation for food away from home (4.8%; October 2024: 4.1%) and streaming services (8.9%; October 2024: 5.3%).

Malaysia's trade surplus widened to MYR 15.3 billion in November 2024 from a marginally revised MYR 12.1 billion in the same month of 2023, easily surpassing market estimates for a gain of MYR 9.1 billion. It was the largest trade surplus since September 2023, as exports grew more than imports for the first time since December 2021. Exports rose by 4.1% yoy to MYR 126.6 billion, accelerating from a 1.6% rise in October and beating estimates of 1.3%, mainly driven by sales of manufacturing (5.2%) and agriculture (13.4%), while mining & quarrying tumbled (-17.3%). Meantime, imports grew by 1.6% to MYR 111.3 billion, the softest growth in a year and less than forecasts of 4.2%, primarily due to rises in intermediate goods (12.7%) and consumption goods (3.5%), as demand for capital goods plunged (-10.0%).

We limit our investment exposure to short-term deposit placements due to the very low risk nature of the Fund.
