FUND MANAGER’S COMMENTS

The Fund rose by 0.27% in June 2020, outperforming the benchmark by 0.14%. Year-to-date (YTD), the fund has underperformed the Benchmark by 1.59%. The Fund will stay fully invested in target funds

The FTSE Bursa Malaysia Shariah Index (“FBMS”) gained 0.12% in June driven by further rally on glove and reopening themes. Top Glove (+21.8%), Press Metal (+20.4%) and Hartalega (+3.67%) were the top contributors to the rally. Big cap blue chips have outperformed the small cap index (-1.7%) in June as retail investors took profit ahead of the decision by regulators on whether to extend short selling restriction beyond 30 June. However, excluding the glove sector, KLCI is trading at 2020 and 2021 PE of 18.3x and 15.3x respectively. This suggests that consensus is looking beyond 2020 for recovery post-Covid-19.

Reopening themes and persistent strong earnings growth momentum of glove stocks will keep Bursa Malaysia elevated in the near term before potential correction in 4Q in the event earnings rebound is slower than anticipated. Uncertainty ahead of a potential snap election will also be a dampener. That said, we believe the correction is unlikely to re-test Mar’s low given the supportive monetary and fiscal stimulus. Considering all factors, we have a neutral stance on the Malaysia equity market, given the prevalent expectation of a swift earnings rebound in 2021. That said, the capital market is flushed with liquidity now following coordinated interest rate cuts by central banks.

For Sukuk strategy, we expect BNM to act again in 2H2020 to secure a better economic recovery. However, the effectiveness of monetary policy as a tool to stimulus the economy is waning, and we are expecting fiscal spending to lead the economy recovery going forward. Low profit rate is likely to stay for another 12 to 18 months pending a meaningful recovery hence we are gradually shifting to higher grade corporates Sukuk for better yield pick-up.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that a Shariah-compliant investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market may adversely affect the performance of the fund.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Reclassification of Shariah status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, Shariah adviser of the issuer, the Shariah Adviser or the Shariah boards of the relevant Islamic indices.
Risk associated with investing in Islamic CIS	Since the Fund will invest entirely into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of this Fund.

RISKS (CONTINUED)

Country risk

The Fund may invest into Islamic CIS which can be domiciled in various countries. Therefore, the Fund will be subjected to risks specific to the countries in which the Islamic CIS are domiciled in. Such risks include adverse changes in economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may be an adverse impact on the prices of the Islamic CIS, which will depress the Islamic CIS's NAV growth, and consequently depress the Fund's NAV growth.

Currency risk

As the Fund may invest into Islamic CIS denominated in currencies other than MYR, any fluctuation in the exchange rate between MYR and the currencies in which the Islamic CIS are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the Islamic CIS are denominated depreciate against MYR, this will have an adverse effect on the NAV of the Fund in MYR and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
