In its statement, BNM stated that the monetary policy stance is slightly accommodative and remains supportive of the economy while continues to see limited risks of future financial imbalances.

Standard & Poor’s (S&P) has affirmed its “A-” and “A” long-term foreign and local currency sovereign ratings of Malaysia stable outlook. The rating agency is quoted as saying that “the stable outlook reflects our expectations that Malaysia’s steady growth momentum and fiscal policy will allow modest improvements in fiscal performance over the next two to three years”. S&P expects GDP growth to moderate to 4.0% this year on weakened global growth environment while current account surplus which is of a rating strength will stabilize around 3.0% of GDP over the next three years.

Headline inflation in Malaysia fell to 2.8% in May (consensus: 3.0%; April: 3.3%), with easing inflation contributed by the fall in the food and beverages sub index at 5.9% for May (April: 6.3%), while core CPI also eased to 3.5% in May (April: 3.6%). Industrial Production Index contracted by 3.3% YoY in April 2023 (March: +3.2%), weighed down by all sectors. The decrease in April 2023 was attributed to contraction in all sectors, namely Mining with -4.9% (March 2023: +0.8%); Manufacturing with -3.0% (March 2023: +4.1%); and Electricity with -2.0% (March 2023: +0.4%).
