FUND MANAGER’S COMMENTS

In September, the Fund declined -0.09% in MYR terms, outperforming the Benchmark by 0.47% led by India, China and Malaysia. Year-to-date, the Fund rose 6.94%, underperforming the Benchmark by 3.17%.

With exception for Europe services PMI, most major economies are showing healthy levels of PMI above 50 in both manufacturing and services. Beyond the sporadic resurgence in Covid-19 cases such as in Europe, we think the overall situation should be contained given better preparedness and hence, the global reflation trend is likely to sustain as we head into the upcoming year. In certain countries with sizable population such India, the Covid-19 curve is showing encouraging signs passed its peak. Monetary policies continue to remain supportive amidst a weak labour market and the absence of inflation.

For regional allocation, are highly invested and mainly positioned in growth-oriented stocks. During the month we had added stocks in the areas of global semiconductor equipment, China automation and Korean automotive parts. For Malaysia, we reiterated our cautious view on the global market perspective driven by US Presidential Election. Heighten volatility in the coming months present a good opportunity to position all portfolios for 1H2021. Furthermore, after two months of market corrections and taking a 3 to 6 months investment horizon, from valuation perspective, KLCI looks attractive. We will continue with our high AA of 90-95% and focus more on adding alpha into all portfolios. Sector in focus will be on Technology, Healthcare, Telecommunication and Energy & Commodity-related. We will reduce our overweight on Plantation and maintain neutral weight for Financial Services.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that a Shariah-compliant investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
Inflation risk	This is the risk that your investment in the wholesale fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market may adversely affect the performance of the fund.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Reclassification of Shariah status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the SAC of the SC, Shariah adviser of the issuer, the Shariah Adviser or the Shariah boards of the relevant Islamic indices.
Risk associated with investing in Islamic CIS	Since the Fund will invest entirely into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the Fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, we will seek for another Islamic CIS that is consistent with the objective of this Fund.

RISKS (CONTINUED)

Country risk

The Fund may invest into Islamic CIS which can be domiciled in various countries. Therefore, the Fund will be subjected to risks specific to the countries in which the Islamic CIS are domiciled in. Such risks include adverse changes in economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may be an adverse impact on the prices of the Islamic CIS, which will depress the Islamic CIS's NAV growth, and consequently depress the Fund's NAV growth.

Currency risk

As the Fund may invest into Islamic CIS denominated in currencies other than MYR, any fluctuation in the exchange rate between MYR and the currencies in which the Islamic CIS are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the Islamic CIS are denominated depreciate against MYR, this will have an adverse effect on the NAV of the Fund in MYR and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
