FUND MANAGER’S COMMENTS

The Fund delivered 0.13% in the month of February 2021, in line with the benchmark, and delivered 2.85% in the 12-months period ending 28 February 2021, underperforming the benchmark by 5bps.

On 16th February, the Government extended the current MCO 2.0 for Selangor, Johor, Penang and Kuala Lumpur until 4th March; while relaxing the restrictions in most other states to the CMCO. The MCO 2.0 is deemed to be less restrictive vis-à-vis MCO 1.0, as more industries and businesses are allowed to operate in the current environment. The Government has estimated the economy to lose a much smaller MYR300 million daily under MCO 2.0 vis-à-vis MYR2.4 billion daily under MCO 1.0. As at the time of writing, the Government has announced that the MCO 2.0 will be lifted in Selangor, Johor, Penang and Kuala Lumpur and replaced with the CMCO from 5 – 18th March. Inter-state travels are still banned, though inter-district travels have now been permitted.

Malaysia has also begun on its vaccination drive in end-February, having acquired 66.7 million doses of COVID-19 vaccines through the COVAX Facility and advance purchases from five vaccine manufacturers (i.e. Pfizer, AstraZeneca, Sinovac, CanSinoBIO & Sputnik V) – enough to cover 109.65% of the population. The Government will carry out the drive in three phases, and targets to vaccinate more than 75% of the population within 12 months.

Malaysia’s 4Q2020 real GDP shrank by -3.4% YoY (3Q20: -2.6% YoY) and -0.3% seasonally-adjusted QoQ (3Q20: +18.2% QoQ), as the CMCO 2.0 came into effect in mid-October 2020. The biggest impact were seen in the services (-4.9% YoY; 3Q20: -4.0% YoY), mining (-10.6% YoY; 3Q20: -6.8% YoY), agriculture (-0.7% YoY; 3Q20: -0.5% YoY) and construction (-13.9% YoY; 3Q20: -12.4% YoY) sectors. For FY2020, real GDP contracted by -5.6%. BNM is currently forecasting a growth between +6.5% and +7.5% for 2021.

Despite the 1Q2021 GDP still expected to be weak, we believe that BNM is likely to keep its OPR at 1.75% for the time being as they deem the current monetary policies to be accommodative to support the recovery.

We limit our investment exposure to short-term Islamic deposit placements due to the very low risk nature of the Fund.

RISKS

Returns not guaranteed	The investment of the fund is subject to market fluctuations and its inherent risk. There is NO GUARANTEE on the investment returns, nor any assurance that the target fund's investment objective will be achieved.
General market environment risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Financing risk	This risk occurs when you obtain financing to finance your investment. The inherent risk of investing with money obtained from financing includes you being unable to service the financing payments.
Manager's risk	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund, e.g. investment decisions undertaken by Principal as a result of an incorrect view of the market may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser, the Shariah boards of the relevant Islamic indices or the Shariah adviser of the issuer.
Credit and default risk	<p>Investment of the target fund may involve a certain degree of credit and default risk. Generally, credit and default risk is the risk of loss due to the counterparty's and/or issuer's non-payment or untimely payment of the investment amount as well as the returns on investment. Principal aim to mitigate this risk by performing fundamental credit research and analysis to determine the creditworthiness of its counterparty and/or issuer.</p> <p>Investment in the target fund is not the same as placing funds in a Shariah-compliant deposit with a licensed Islamic financial institution. There are risks involved and investors should rely on their own evaluation to assess the merits and risks when investing in the target fund.</p>
