FUND MANAGER'S COMMENTS

Equity

Strong selection in consumer discretionary, consumer staples and health care was partially offset by selection in financials and information technology. On a regional basis, strong stock selection in North America and Japan was partially offset by selection in Emerging Markets and Developed EU & Middle East ex UK. Within consumer discretionary and consumer staples, our top relative contributors were not owning Alibaba and an overweight to Unilever, respectively. Within financials and real estate, our top relative detractors were overweights to MSCI and KE Holdings, respectively.

Shares of Chinese internet giant Alibaba declined following a report Japanese tech investor SoftBank sold almost all of its remaining stake. The share price of MSCI, a US-based provider of decision support tools for the global investment community, fell in April after management reported 1Q23 results. Lower growth in the ESG & Climate segment, due to regulatory headwinds and longer sales cycles, weighed on results and pressured shares. MSCI's operating segments include Index, Analytics, ESG and Climate, and Real Estate.

Sukuk

Overall, the sukuk sleeves underperformed benchmark at 0.20, driven by corporate and industrial sectors. Malaysia Sukuk Gbl 04/2031 was the main contributor whereas Pelabuhan Tanjung 04/2026 Myr was the main detractor. We maintain our strategy in defensive position while ensure desirable return to the portfolio. Our credit exposure where GCC region accounted by 47.35%, Saudi Arabia (SA) (22.64%), United Arab Emirates (UAE) (19.86%), Qatar (3.49%) and Kuwait (1.36%). Our exposures in Malaysia and Indonesia are 37.04% and 15.61% respectively.

RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

General market environment Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
Inflation Risk	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
Manager's Risk	This risk refers to the day-to-day management of the target fund by UOBAM which will impact the performance of the target fund, e.g. investment decisions undertaken by UOBAM as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weakness in operational process and systems may adversely affect the performance of the target fund.
Reclassification of Shariah non-compliant status Risk	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), the Shariah adviser or the Shariah boards of the relevant Islamic indices. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event the Shariah non-compliant securities are disposed at a price lower than the investment cost, it may adversely affect the value of the target fund. Thus, it may cause the NAV of the target fund to fall.
Credit and Default Risk	<p>Credit risk relates to the creditworthiness of the issuers of Sukuk, Islamic money market instruments and/or financial institutions where the Islamic deposits are placed and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer of the Sukuk, Islamic money market instruments and /or financial institutions where the Islamic deposits are placed may impact the value as well as liquidity of the Sukuk, Islamic money market instruments and/or Islamic deposits. In the case of rated Sukuk, Islamic money market instruments and financial institutions, this may lead to a credit downgrade.</p> <p>Default risk relates to the risk that an issuer of a Sukuk, Islamic money market instrument or a financial institution where the Islamic deposits are placed either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the Sukuk, Islamic money market instruments and Islamic deposits. This could adversely affect the NAV of the target fund.</p>
Interest Rate Risk	Interest rate risk refers to the impact of interest rate changes on the valuation of Sukuk and/or Islamic money market instruments. When interest rates rise, Sukuk and/or Islamic money market instruments prices generally decline and this may lower the market value of the target fund's investment in Sukuk and/or Islamic money market instruments. The reverse may apply when interest rates fall. Meanwhile, Sukuk and/or Islamic money market instruments with longer maturities and lower profit rates are more sensitive to interest rate changes.

RISKS (CONTINUED)

Equity Risk

As the target fund will be investing in Shariah-compliant equities, the target fund will be affected by equity risk. Generally, equity risk may arise in the following forms, i.e., equity risks related to external factors and equity risks related to company-specific factors. All of these related equity risks can adversely affect the prices of equities, which would negatively impact the performance of the target fund.

Country Risk

The target fund is also subject to country risk. The value of the assets of the target fund may also be affected by the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the target fund may invest in. Further, when investing in foreign markets, there are countries which may require prior approvals before investments can take place.
