#### FUND MANAGER'S COMMENTS

The Fund's performance for the month of September was 0.25%, marginally underperforming its benchmark's performance by 0.02%.

The Malaysian government bond market was relatively quiet at the beginning of the month due to the National Day holiday and a lack of fresh market catalyst coupled with cautious sentiment heading towards Bank Negara's Monetary Policy Meeting ("MPC") on 18 September. The Malaysian Government Securities ("MGS") yield curve then rallied slightly after Bank Negara Malaysia (BNM) left overnight policy rate ("OPR") unchanged at 3.25%. However, the MGS yield curve started to taper the later part of the month as market participant believes that US policy rates will remain low in the near term. As a result, the MGS yield curve bear steepened in September with yields higher on the longer tenor of the curve. Trading volume for corporate bonds was lower in September with RM10.97 billion worth of transactions concluded in the market, 12% lower than the previous month's RM12.58 billion in transactions.

The language in the recent Monetary Policy Statement seems to be "less" hawkish as BNM maintained reference to destabilising financial imbalances and added "further adjustment to the degree of monetary may be taken". BNM will need to further monitor the economic data before continuing its monetary policy.

We continue to concentrate mainly on corporate bonds. We prefer primary and secondary issues that have already priced in the risks going forward such as the potential OPR hike and the alignment of sovereign yields.

#### Disclaimer:

The benchmark performance is not a guide to future performances which may differ. The performance of the fund is not guaranteed. The value of the fund will fluctuate and may fall below the amount of premiums paid and the fund value depends on the actual performance on the underlying investment.
