## FUND MANAGER’S COMMENTS

In December, the Fund rose 4.05%, outperforming the Benchmark by 1.66% led by China and Malaysia. In 2021, the Fund rose 15.09%, underperforming the Benchmark by 1.13%.

With economic normalization, mass rollout of Covid vaccines in 2021 and abundant liquidity in capital markets, we expect Asian equities to perform well. While the complete rollout of vaccines will be a multi-year process that spans beyond 2021, the overall situation should be relatively more controlled with better awareness and measures to contain the spread of the virus. Under President Joe Biden, we expect the relationship between US and China to be no worse off than under President Trump and hence less negative shocks to the economic repair in China and in Asia.

We are fully invested and favour growth-oriented stocks. While we think the rally will broaden out, we are selective in picking companies that have long runway in terms of growth and are not overvalued. Recently, we have added positions in Chinese industrial automation and cement, tourism in Thailand and healthcare in India. As for Malaysia, with major headwinds (US Presidential Election and Malaysia Budget 2021) are now being addressed and cheap valuations, we are now cautiously optimistic for 1H2021. Earlier hope for rapid recovery in 4Q2020 may be dented (due to resurgence of COVID-19 globally) but we are now confident of a sustainable economic recovery in 1H2021. As a result, we will continue with our high AA of 90-95% and focusing on post COVID-19 recovery theme. Sector in focus for will be on Financial Services, Consumer, Technology and Commodity-related (weakening of USD), whilst at the same time reducing our position on the Healthcare and REIT sectors.

## RISKS

All investment carries some form of risks. The potential key risks include but are not limited to the following:

<b>Market risk</b>	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the target fund's NAV.
<b>Inflation risk</b>	This is the risk that your investment in the target fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce your purchasing power even though the value of the investment in monetary terms has increased.
<b>Manager's Risk</b>	This risk refers to the day-to-day management of the target fund by Principal which will impact the performance of the target fund. For example, investment decisions undertaken by Principal, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the target fund.
<b>Reclassification of Shariah status risk</b>	This risk refers to the risk that the currently held Shariah-compliant securities in the target fund may be reclassified as Shariah non-compliant in the periodic review of the securities by the Shariah Advisory Council of the Securities Commission Malaysia (SACSC), Shariah adviser of the issuer, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, Principal will take the necessary steps to dispose of such securities. There may be opportunity loss to the target fund due to the target fund not being allowed to retain the excess gains derived from the disposal of the Shariah non-compliant securities. In the event that the Shariah non-compliant securities are disposed of at a price lower than the investment cost, it may adversely affect the value of the target fund. Thus, it may cause the NAV of the target fund or price of units to fall.
<b>Risk associated with investing in Islamic CIS</b>	Since the target fund will invest entirely into Islamic CIS, there is a risk of concentration into Islamic CIS, in which the Islamic CIS's management company has absolute discretion over the Islamic CIS's investment technique and knowledge, operational controls and management. In the event of mismanagement of the Islamic CIS and/or the management company, the NAV of the target fund, which invests into those Islamic CIS would be affected negatively. Should the situation arise, Principal will seek for another Islamic CIS that is consistent with the objective of the target fund.
<b>Country risk</b>	The target fund may invest into Islamic CIS which can be domiciled in various countries. Therefore, the target fund will be subjected to risks specific to the countries in which the Islamic CIS are domiciled. Such risks include adverse changes in economic fundamentals, social and political stability, laws and regulations and foreign investments policies. These factors may have an adverse impact on the price of the Islamic CIS, which will depress the Islamic CIS's NAV growth, and consequently depress the target fund's NAV growth.

**RISKS (CONTINUED)**

**Currency risk**

As the target fund may invest into Islamic CIS denominated in currencies other than MYR, any fluctuation in the exchange rate between MYR and the currencies in which the Islamic CIS are denominated may have an impact on the value of these investments. You should be aware that if the currencies in which the Islamic CIS are denominated depreciate against MYR, this will have an adverse effect on the NAV of the target fund in MYR and vice versa. You should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
