FUND'S MANAGER COMMENTS

The Fund's performance for the month of March 2018 was 0.08%, compared to the benchmark return of 0.27%.

In March 2018, Malaysia Government Securities ("MGS") traded richer on the belly of the curve as yields tightened by 4 to 14 bps between the 3 and 20-year MGS. We believe the strong interest in the govies was driven by liquidity from the MGS/MGII maturity in February and March totaling RM16.4 billion. The risk off mode in the global market have also resulted in better buying interest in the govies as UST yields traded tighter in respond to possible trade war between the U.S and China. During the month, the benchmark 3-, 5- 10-, 15- and 30-year MGS yields close at 3.37%, 3.60%, 3.98%, 4.40% and 4.89% respectively.

Corporate bond/Sukuk trading volume returned with RM13.9 billion traded after the lackluster February's festive season. This was also higher than similar period previous year's RM11 billion. Most of the trades remain focused on AA Corporates and GGs with interest returning on the AAA. Credit spreads widened in March for all ratings bringing the first quarter of the year's credit spread wider than the 3 year average for the AAA. Generally the 5 and 7 year saw greater quantum of widening compare to the rest of the curve.

On the Fund's strategy and outlook, we prefer to maintain our investment in credit segment for stable and higher total return but will participate in the government bond market if trading opportunity arises. On technical note, we prefer AA-rated fixed income investment as supply is expected to be less compared to Government Guaranteed securities. Lastly, we maintain our neutral call on duration as interest rates environment globally is still on hawkish tone.
